2008 Survey Reports

This is one of four separate documents that present aspects of the 2008 Survey of foster parents and relative caregivers in Washington State. Below is a brief description of the contents of each report:

- **Braam Outcomes Report 08-045**

This report presents an introduction to the purpose of the survey, provides an overview of the survey methods, and describes the calculation of nine specific Braam Panel outcomes. The report presents the results for all licensed and unlicensed caregivers and for the six DSHS regions.

- **Appendix to the Braam Outcomes Report**

The appendix to the Braam outcomes report includes the detailed data tables and survey results that were used in the calculation of the nine specific outcomes.

- **SESRC Data Report 08-044**

This report is a compilation of the survey methods and survey results and includes a copy of the telephone interview questionnaire, the letter mailed to foster parents and relative caregivers, and other survey materials. This report includes the final sample disposition, and the results for every question in the survey for licensed and unlicensed caregivers.

- **Appendix to the SESRC Data Report**

The appendix to the survey data report includes a frequency tabulation of all survey questions for all survey respondents. There are also separate sections for frequency tabulations of all survey questions for licensed caregivers, and for unlicensed caregivers.
