Measure Description:
 Source: Famlink provider and placement records. Monthly average over FY: count of bed capacity for all homes with a valid WA foster home license divided by count of children in a licensed foster home bed on the last day of each month.

 The Children's Administration has met the benchmark since 2005.

Measure Description:
 Source: Famlink placement records.

The apparent drop in stability rates for FY09 has been caused by differences between the way CAMIS and FamLink stability measure data represent placements and in-home dependencies (now called trial return home).

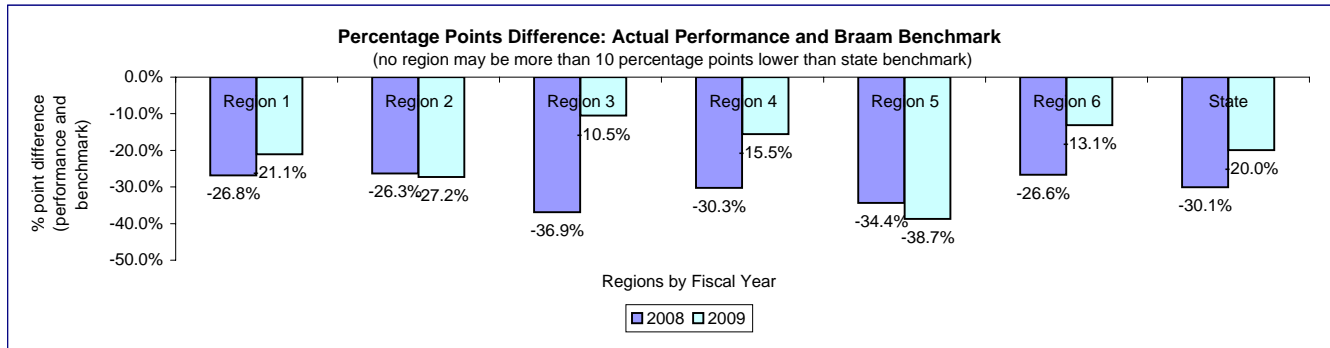

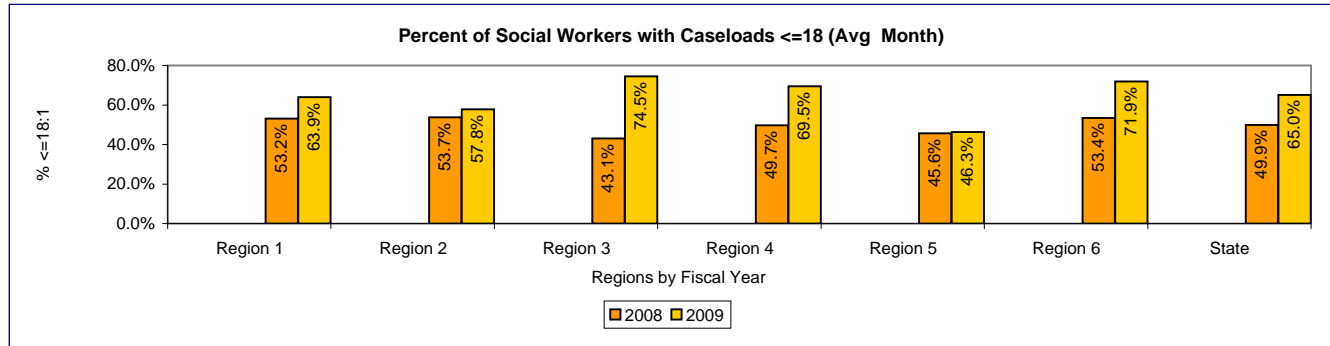

A comparison of CAMIS and FamLink stability data revealed that a number of stable placements included in the CAMIS measure data were excluded from the FamLink measure data. Reasons for these exclusions included: a) more stringent criteria for defining CA legal care and custody; b) more stringent criteria for identifying valid out-of-home placement episodes based on end reason codes, and c) the exclusion of short-term placements that were followed by in home services, which were bridged in the CAMIS data to create a 'great' episode but have not been bridged in the FamLink measure data.

Detail: a) children without legal custody records indicating CA responsibility were not included in the measure data for FY09. These children would have been assumed to be in CA custody in the CAMIS measure data. b) converted CAMIS placements with an end reason of 'fiscal cleanup' were excluded or bridged with another Bridging out-of-home and in-home episodes was necessary in CAMIS because these were both recorded as placement episodes. Famlink bridging should not be necessary because Famlink is capable of including the trial return home as part of the out-of-home placement episode. However, CAMIS trial return home records were often converted as temporary placement types.

Measure Description:
 Source: HRSA data based on match with children in placement during FY09. Based on date of service request and date of RSN intake from records provided by HRSA for all children in care during the FY with a service request. Measure evaluates if children in care anytime during FY08 had a service request if so, the days between their service request(s) and their intake dates. If any intake date is within 30 days of any service request date the child is counted as compliant on this measure. NOTE: While service request data do not specify the type of service that was requested, MHD reports that these dates all represent requests for assessment/re-assessment (aka 'intakes'). Children and youth can have multiple request dates and intake dates in the data submitted by HRSA. Region designations only represent the placement region, not the region in which the child was residing at the time of the service request. Pierce County Data are not available for this measure Given prior performance of Pierce County in the past, the Panel agreed to substitute the statewide average for Pierce County as the measure until an RSN is operational (anticipated in FY2010) and actual data can be reported.

Percent With Assessment Within 30 Days of a Request

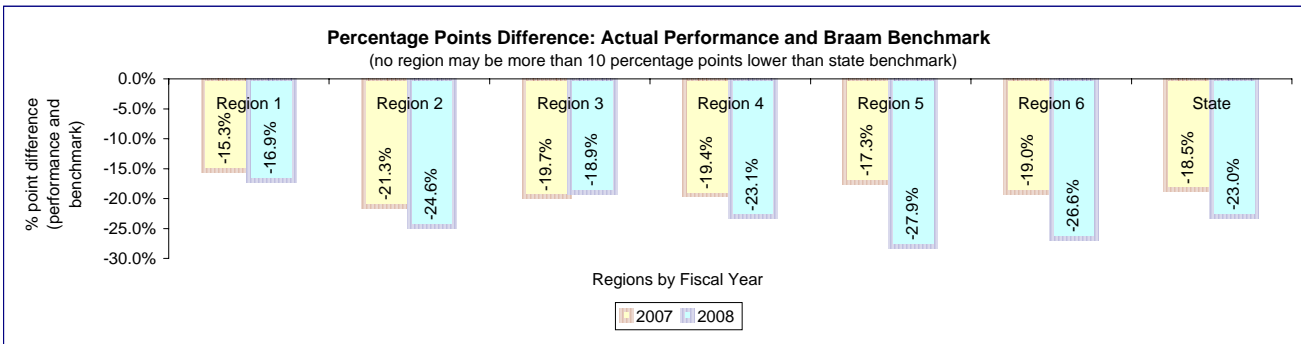

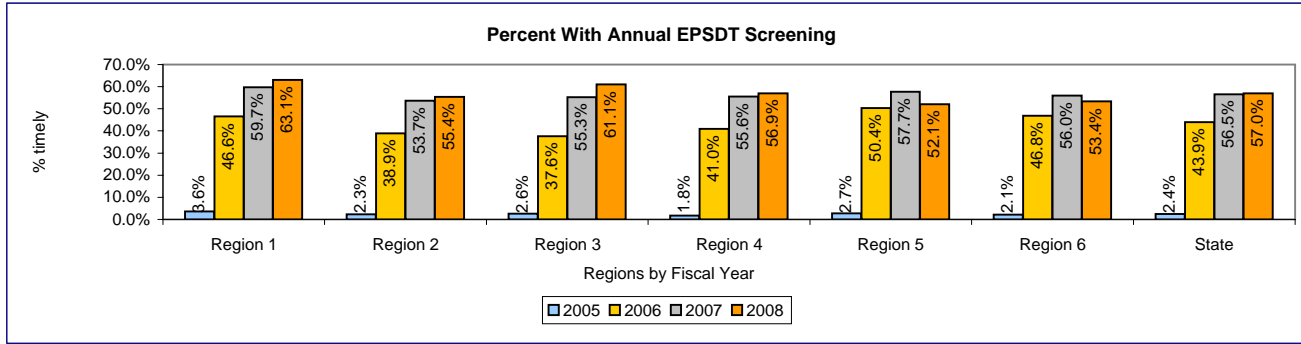

Percentage Points Difference: Actual Performance and Braam Benchmark

Measure Description:
 Source: FamLink placement and case not activity records. Percent of children who received a health and safety visit each and every month they were in care for a full month during the FY. Estimate based on logic that emulates federal requirements. In September 2008 of FY09, Children's Administration implemented a policy requiring visits with children every calendar month with no longer than 40 days between health and safety visits. As this measure evaluates if youth received a visit every calendar month they were in placement over the entire fiscal year, it is not anticipated that Children's Administration will achieve a significant increase in this measure until FY2010. Information on the proportion of children visited in a single month is also provided to the Panel throughout the year.

Measure Description:

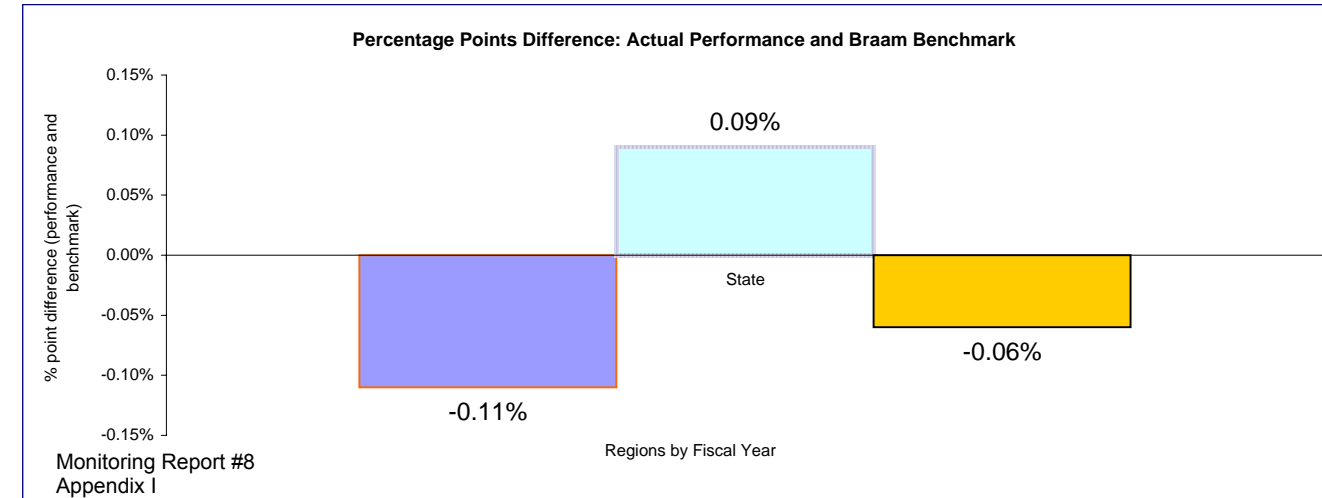

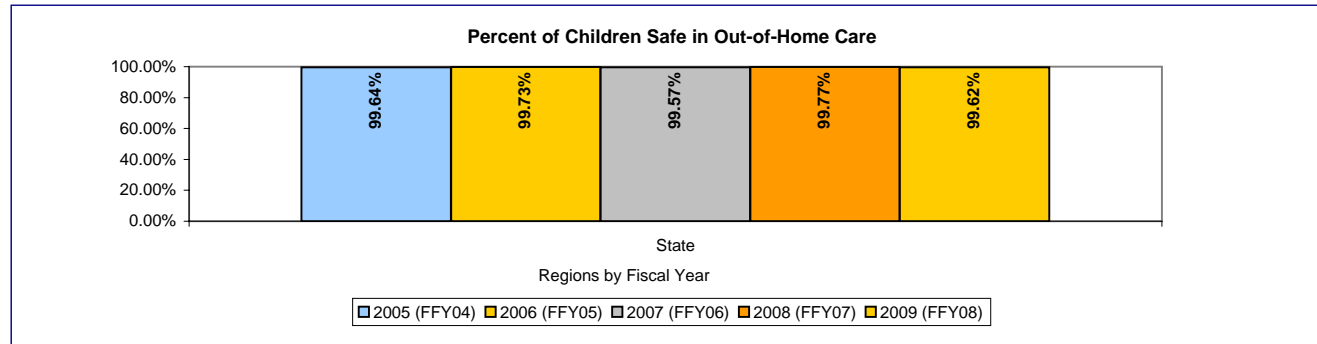

Source: ACF. Calculated measure based on administrative data submission. Regional statistics are not provided to States.

The national standard is 99.68% or more. The national median = 99.5, and the 25th percentile = 99.30

Measure Definition: The percentage of children who are not victims of a founded report of child abuse or neglect by a foster parent or facility staff member will meet or exceed the federal Child and Family Services Review standard.

This data element is used to determine the State's conformity with CFPSR Safety Outcome #1 ("Children are, first and foremost, protected from abuse and neglect"): Of all children in foster care during the reporting period, what percent were not victims of substantiated or indicated maltreatment by foster parent or facility staff member. Counts of children not maltreated in foster care are derived by subtracting NCANDS count of children maltreated by foster care providers (as determined by reports of child abuse or neglect founded after investigation by DLR/CPS) from AFCARS count of children placed in foster care. The observation period for this measure is 12 months. The number of children not found to be maltreated in foster care and the percentage of all children in foster care are provided.

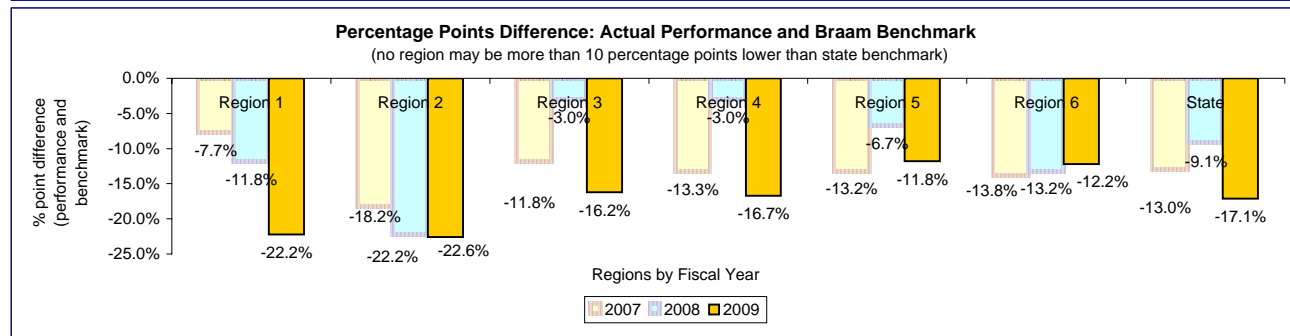

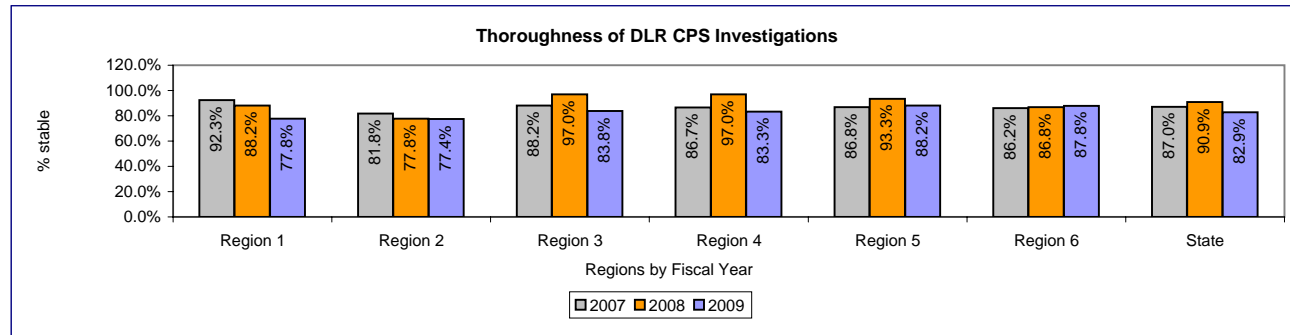

In FY2008, 17,175 out of 17,215 children were safe per this standard. 40 children were the victims of a founded report of child abuse and neglect. In FY2009, 17,197 out of 17,263 children were safe. 66 children were the victims of a founded report of child abuse and neglect.

Measure Description:

Source: Famlink placement records using the same proxy method to identify sibling groups that has been used with CAMIS data due to absence of adequate relationship information for children with only conversion records in Famlink. Children must be removed within 7 days of each other, share a common case id, be initially placed in a family type home and remain in out-of-home care for at least 30 days to be included in this population. Unlike CAMIS measure data, FY09 results exclude children who were removed and received BRS services in the foster home.

Measure Description:
 Source: Foster Parent Survey. Children's Administration implemented a policy requiring the provision of two visits or contats between siblings per month in September 2008. This was possible after the Legislature provided funds to contract for this service. Measurement of the actual numbers of visits and contacts is not possible until CA implements the new management information system, FamLink.

Measure Description:
 Source: FamLink placement records. Famlink data include only 5 transitional staffings for youth who exited care during FY09, 3 within 180 days of exit. These data were not available in CAMIS and are now being entered in FamLink for SFY10 as of FamLink implementation on 2/1/2009.

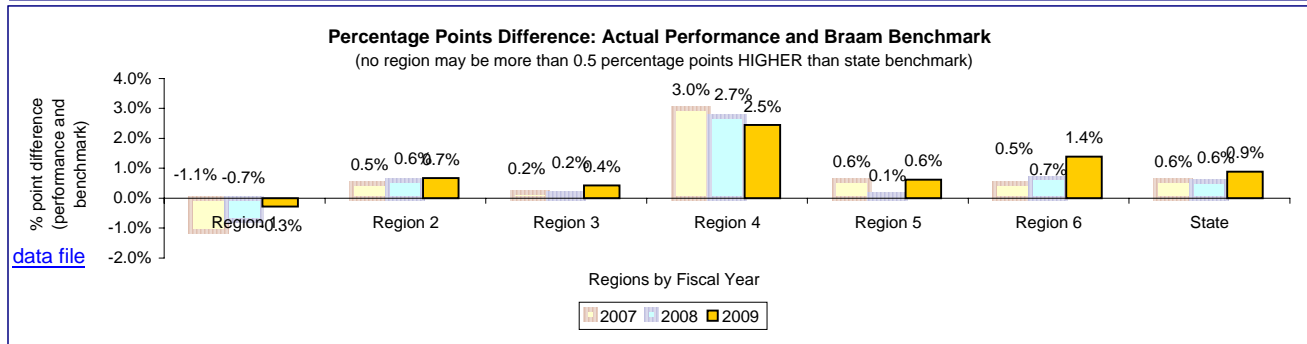

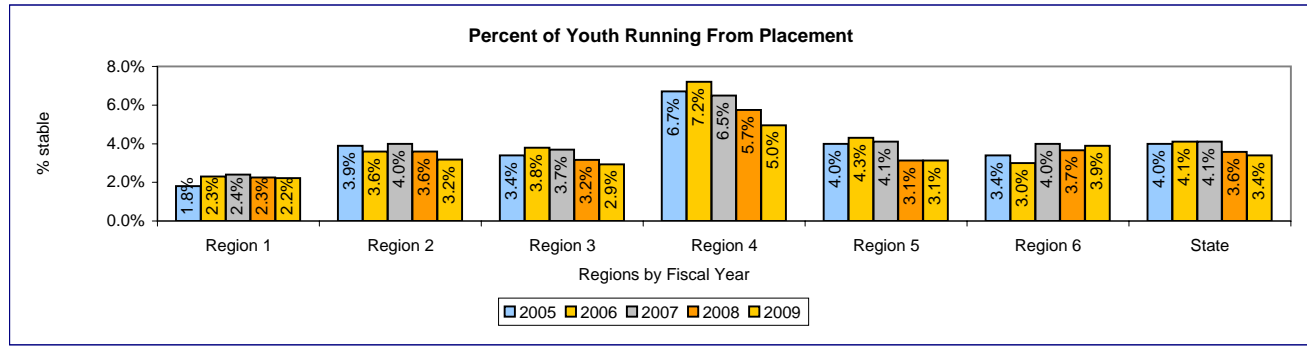

Current data are not suitable for compliance evaluation.

Measure Description:

Source: FamLink placement records. The percent of all children in the Department's custody in out-of-home care on the last day of the FY who ran during the fiscal year - median time in run events.

The decline in median length of time on the run may be related to changes in FamLink placement records compared to CAMIS. This change may reflect the clean-up of placement records that occurred prior to and during FamLink implementation.

Many placements that appeared to be open in CAMIS were corrected and closed for conversion to FamLink. Long run events associated with these placements no longer appear in the measure data.
