### **HIGH BLOOD SUGAR REVIEW: Important Points to Remember**

---

- Know your client's individualized Target Range** for blood sugars.
- Use a glucometer** to check your client's blood sugar if he or she shows symptoms of high blood sugar.
- Follow your delegating RN's instructions for high blood sugar** whenever your client's blood sugar tests above his or her individualized Target Range.
- Call 911 immediately** if your client is non-responsive. Notify your delegating RN as soon as possible after your client has received emergency help.
