ALTSA: AFH #2015-005
USE OF EMERGENCY MEDICAL SERVICES

Dear Adult Family Home Provider:

This supersedes ADSA: AFH #2010-014 – Use of Emergency Medical Services.

The purpose of this letter is to remind you of relevant state laws and rules pertaining to your responsibilities related to residents, their medical issues, and the use of the local fire department / emergency medical services (EMS) or “9-1-1.” Please remember that you are required to have sufficient and trained staff at all times to respond to resident needs, including medical emergencies. Applicable sections in Chapter 388-76 WAC – AFH Minimum Licensing Requirements include 10195, 10250, 10330, 10335, 10355, 10390 and 10545.

You should only call 9-1-1 when the resident:

- Has an acute/serious, life-threatening medical condition or complaint;
- Is medically unstable; or
- Has an immediate health risk.

Do not call 9-1-1 when the resident’s condition is:

- Medically stable; or
- Non-acute or not serious.

Providers who choose to admit or retain a resident with a risk of falling must have systems in place and available staff that are able to respond to non-emergent falls without calling 9-1-1. This includes evaluating the resident’s condition after a fall and assisting the resident back to the pre-fall position, if there are no signs of injuries.

This letter does not mean that you should never call 9-1-1. When your evaluation of the resident shows that the resident may have a medical emergency, you should call 9-1-1. Enclosed is guidance to use when calling 9-1-1.

If you have questions about this topic and the licensing requirements, please contact your local Residential Care Services Field Manager. For additional guidance regarding medical emergency response in your facility, you may contact your local fire department or an EMS provider.

Sincerely,

Carl I. Walters II., Director
Residential Care Services
