Question	Answer	Responder
MTSW questions		
If we don't have any diabetic residents and we only send out or use mobile labs or ask labs to come and get the specime sample, ex: urine, blood, etc. then do we still need this license?	If your staff are not completing any test on-site, instead you are just collecting samples and sending them out to an off site lab that holds a license, then you do not need a license.	Jennifer Hopgood, Liz Parent DOH
If residents are checking their blood glucose without assistance does our site need a license?	If residents are checking their own blood glucose and independently using their test results to determine the amount of insulin/ medication to take without any guidance than a license is not required. If staff are assisting with testing or using test results for medical decisions, (such as "take this amount of insulin"), or informing residents physician of results, then a license is required. Thus if your residents are testing completely on their own then a license is not required.	Liz Parent
Can we get the slides emailed to us? There were no registrations, so how can we get the slide?	They are posted on the ALTSA Adult Family Home provider page.	Colleen Jensen
Free COVID tests from government for personal usehow do these stack up?	Some local health jurisdictions can assist AFHs with no cost testing kits. You will need to check with your county's health department. For questions about test kits and accuracy you will need to search for information on the FDA's website.	Jennifer Hopgood Liz Parent
For Section 3 on the application, can the AFH provider/ owner be listed for both Lab director and contact person?	Yes, lab director and lab contact can be the same person.	Jennifer Hopgood Liz Parent
How much is the test license fee ?	\$190 for the two year term.	Jennifer Hopgood Liz Parent
Would you remind me what to write on the glucose test?	"Blood glucometer Cleared by FDA for Home Use" under Glucose, or the name of the Glucometer and test kit if the information is available.	Jennifer Hopgood Liz Parent
To do a glucose test does the adult family home need a license for this?	If the site staff are involved in the testing, yes a license is required.	Jennifer Hopgood Liz Parent

Does the Lab Director section need to be filled out? Can I leave it blank, if our staff are only testing for blood sugar?	Yes, the Lab Director section must be filled out, it is required to process the application. There are no personnel requirements to be the Lab Director for a waived site - the individual is not required to be a nurse, doctor, etc. Please list the person who is responsible for the license and testing. They do not have to have a Washington State Professional License (that can be left blank). The Lab Director and lab contact can be the same person, so you can put the same name in both locations.	Liz Parent
Will this power point be made available to		Colleen Jensen
us to use as a reference? What's the point of nurse delegation with special focus on diabetes with employee if turnover rates high, diabetic patients are not always in home now that you have to have a special license on top of that?	The MTSW requirement has been in effect since 1990, you need a license if you perform testing on someone else. It relates to laboratory requirements. (Liz) Nursing Delegation refers to who is doing the testing. If blood sugars are tested by caregiving (non-licensed staff), then Nurse Delegation is required. (Katherine)	Liz Parent and Katherine Ander
Section four (on the application): What do you write on the lines? (For COVID)	Section four (pages 3-6) is to list the tests you are using and completing at your facility. Please list the test kits next to the analyte or test ie. glucose, the name of the test kit is on the test kit box. Also for glucose on page four, you may list "Blood glucometer Cleared by FDA for Home Use" if your staff are helping residents complete a glucose test but do not know the brand of the test kit.	Liz Parent
Could you please explain a little bit about section 5 (on the application)?	Section 5: For Legal Owner Information just put in the required information (name, phone number, etc.) of the owner of the company. For Section 5 the Change of Ownership Information can remain blank unless the company owner/Fed ID number/ UBI number is changing.	Jennifer Hopgood

A license is required before testing takes place. A license is required before testing takes place. Liz Parent place. A license is required before testing takes place. A license is required before testing takes place. A license is required for each because place. Book profit or government agency, which can have multiple sites. No, you do not need to fill out an MTS license application unless you or your staff are completing or assisting with testing. Bload glucase the director of the site because place. A side from the provider as lab director will the caregivers be listed (on the application)? Bload glucose meaning blood sugar check, right? So do we need to get this license if we're doing blood sugar check before injecting insulin, right or no? If your staff are assisting with the testing or offering medical advice (such as take the license if the resident is completing the blood glucose testing on their own and the resident is independently determining the amount of insulin to take then a license is not required. Does the Lab Director have to be the testing can be listed.			
to approve? Or do I have approval for a CLIA before I even have a resident that needs the care? If we have more than one AFH Home do we need a license for each home? 	Learn and a second	I · · ·
If our residents are physically disabled, are we required to get a license in order to give them COVID test or check blood glucose even though we have licensed RN' and LPN's on site at all times?	If the site is using the test result for medical purposes, yes a license is required. If your site is helping a person with a physical disability complete a home use covid test or blood sugar test and the site is not using the result for treatment decisions then in this situation	Liz Parent and Katherine Ander
	a license is not required, as staff are helping a person with a physical disability complete a self-test, to note - the test must be approved by the FDA for home use. Also, the need for a license does not depend on if your site has licensed personnel, it depends on if your personnel are completing the tests. (Liz) If blood sugar testing is occuring on site, an MTSW is required. (Katherine)	
Will HCS and DDA screen homes for MTSW when making placement for residents who require BG monitoring for example?	After discussion with DDA and HCS it was determined no change in placement practice is anticipated related to the MTSW requirements.	RCS
I am not planning to do Covid Rapid testing right now but I might need it in the future if anyone gets an exposure. Should I add it on my license test?	If your facility possesses the tests already, and you most likely will be using them to test residents, then you can add them to your license. If you do not posses the test kits than please do not add them as you will not be able to provide the name of the test and manufacture.	Liz Parent
Will Home & Community Services (HCS) be limiting placement of new residents who may need MTSW required testing to homes that already have this license? Will this be a consideration for placement and/or will HCS inform providers they may need a MTSW if they admit a resident needing one of these tests?	After discussion with DDA and HCS it was determined no change in placement practice is anticipated related to the MTSW requirements.	RCS
Will case managers with HCS and DDA consider the need for a MTSW when looking to place a resident with needs that would require testing?	After discussion with both DDA and HCS it was determined no change in placement practice is anticipated related to the MTSW requirements.	RCS

if we don't get CLIA because we are not comfortable doing blood glucose check helping with testing but the HH nurse is	ı
and not comfortable giving insulin but the doing testing & there should be a license,	
home health nurse will come to check the lit is important to check with the home	
blood glucose, do we need to get CLIA health nurse to ensure they have a	
'	
testing. Have them reach out to	
LQA@doh.wa.gov with questions.	
So a medication for blood pressure that No, blood pressure measurements are Liz Parent	
requires you to take BP, which not CLIA tests, a Medical Test Site license	
determines if and what dose is given is for samples performed on a specimen	
does this require a CLIA? or body fluid such as blood, urine, saliva.	
I take fasting blood sugar every morning, Unless a staff member is involved, an Liz Parent	
do I need CLIA? individual performing blood sugar tests	
on themselves would not require a	
MTSW/CLIA license- it is self-testing.

materials derived from the human body	
for the purposes of health care,	
treatment, or screening. A medical test	
site does not mean: (a) A facility or site,	
including a residence, where a test	
approved for home use by the Federal	
Food and Drug Administration is used by	
an individual to test himself or herself	
without direct supervision or guidance by	
another and where this test is not part of	
a commercial transaction;	
Is a RN need CLIA or only caregivers? Or Medical Test Site licenses are site Liz Parent	
everyone need one specific, so sites or addresses where	
testing takes place need licensed. If you	
have a private practice, say as an RN, and	
go out to homes to take blood sugar	
tests on folks, you will need a license,	
likely as a mobile site.	
How long should we expect the license Licenses are currently taking 3-4 weeks Liz Parent	
process to take? to process once WA state DOH has	
received the application.	
If a diabetic has the implant and you are No, not unless you are using the result Liz Parent	
using a device to read results you for medical treatment, ie. giving insulin.	
wouldn't need the license correct?	

i i	Yes, that is an activity that requires	Liz Parent
for checking blood glucose before giving	licensing at the site.	
insulin, right? or we don't need a license.		
So if the resident is testing their own	Yes, a license is required if staff are	Liz Parent
blood glucose and telling us the level and	involved in determining how much	
all we do is determine the amount to give	insulin to deliver, as this is a medical	
but the resident does the injection	decision based off a test result.	
themselves, is a license required		
,		
Will you provide the link with these	Yes, it is on the AFH Provider webpage	Colleen Jensen
presentations again please	, ,	
	Clinical Laboratory Improvement	Jennifer Hopgood
there a class for it or just application to	Amendments. (Jennifer) CLIA is the	and Liz Parent
get the license? Can we have a zoom	certificate required in most US states.	
I -	WA is exempt from CLIA, we have state	
_	laws that apply in WA requiring a Medical	
1	Test Site (MTS) License. WA state	
	medical test site licenses are issued with	
	an MTS number as well as a CLIA number-	
	for billing purposes. (Liz)	
	()	
Do all staff working at the AFH need a	A Medical Test Site License covers the	Jennifer Hopgood
CLIA number ?	facility and everyone in it. (Jennifer) Yes,	and Liz Parent
	a CLIA covers all testing at an address or	
	location. (Liz)	
Do you recommend getting a new license	Yes, and we are here to work with folks	Liz Parent

Question	Answer	Responder
MTSW questions		
Can you repeat the two reporting for covid?	Any positives or negatives are reported to state. Some LHJs do not want negatives reported. Under the license, all test results are to be reported. Specifically for long-term care facility sites, do require reporting positive COVID test, no need to report negatives to the state.	Liz Parent/Jennifer Valverde
If residents are at the hospital or ER and the are tested positive, will the home need to report again?	The home will not need to report the result again to the state because the hospital or ER where the resident was tested will be the one to report this result. If the result is reported twice it will cause a duplicate record.	Jennifer Valverde
How do you report if you don't need a license?	Positive POC COVID results for self-tests can be reported to the Department of Health (DOH) by calling 1-800-525-0127	Jennifer Valverde
Can you please review the reporting requirements for each test?	Any positives or negatives are reported to state. Some LHJs do not want negatives reported. Under the license, all test results are to be reported. Specifically for long-term care facility sites, do require reporting positive COVID test, no need to report negatives to the state.	Jennifer Valverde
Simple Report is applicable to an Assisted Living as well?	Yes, if an assisted living facility is using point-of-care (rapid) tests, they can use SimpleReport to report their positive COVID test results.	Jennifer Valverde
What is the benefit of using a Simple report rather than reporting directly to the LHJ?	LHJs have access to Washington Disease Reporting System to search for residents who have tested positive for COVID - if LHJs need to keep track of folks in their county who have tested positive, they can run a report in WDRS for the results. Depending on how the facility is reporting (pdf or spreadsheet) this can cut down on time it takes to collect and report the information. It goes straight to the state.	Jennifer Valverde

Are Covid tests the only tests that are required to be reported? If not, what other test results need to be reported? Thank you

There is a list of notifiable conditions. https://doh.wa.gov/public-healthhealthcare-providers/notifiableconditions/list-notifiable-conditions. Any test not performed at your site does not need to be reported, the laboratory reports tests they perform. Any test ran on site - and immediate results are returned on site, then consult list of reportable conditions. i.e. test kits beyond COVID. If doing any tests done at the home, assisting the resident, a MTSW license is required. (Liz) There is there is a difference between reporting lab results and being required to report notifiable conditions as a healthcare setting. Some things you are required to report even if not doing the test such as an infectious disease. As a health care setting you must notify an "occurrence" or outbreak. In other circumstances, if running tests in home and getting results, the lab results need to be reported. EXAMPLES: COVID-19 test, HIV test If your resident tests positive at another facility (like the hospital) & returns to

you, you do not need to report. The
