UPDATES FROM WASHINGTON STATE DEPARTMENT OF HEALTH

Dear Administrator/Provider/Superintendent:

This letter is to notify you of information recently provided by the Department of Health (DOH).

1. DOH moved all COVID-19 Healthcare Infection Prevention materials to one location on the DOH website. Now, regardless of the healthcare setting, all COVID-19 infection prevention guidance for healthcare settings can be found here:
<https://www.doh.wa.gov/Emergencies/COVID19/HealthcareProviders/InfectionPrevention>
2. Beginning in January 2021, most health care facilities and agencies in Washington are eligible for free online respiratory medical evaluation and on site (or mobile) respirator fit testing. The DOH fit testing webpage has been updated with new information. County assignments have changed for fit testing providers.
<https://www.doh.wa.gov/ForPublicHealthandHealthcareProviders/HealthcareProfessionalsandFacilities/HealthcareAssociatedInfections/FitTesting>
3. In May 2021, CDC updated recommendations on use of non-NIOSH approved respirators. During the COVID-19 pandemic, CDC allowed the use of non-NIOSH approved respirators while supplies were limited. As the supply chain for respirators is returning to normal, FDA and CDC have revised recommendations to allow only NIOSH approved respirators when respiratory protection is needed. For example, use only a NIOSH approved N95 respirators when caring for patients/residents/clients who are known or suspected to have COVID-19 and for aerosol generating procedures. Healthcare workers may continue to wear non-NIOSH approved KN95 and other respirators as source control.

What this means to you, effective immediately:

- Use only NIOSH approved N95 respirators when respiratory protection is needed
- Healthcare workers may continue to wear non-NIOSH approved KN95 and other respirators as source control only

For more information, please see:

[FDA's recommendation to transition from use of Non-NIOSH approved respirators](#)
[FDA's considerations for selecting respirators for your healthcare facility](#)
[CDC's strategies for optimizing the supply of N95 respirators](#)

To check your respirators
