

Funding for In Person Visitation Aids

As of early September 2021, funding for in-person visitation aids has been approved for 85+ nursing homes, totaling nearly \$215,000. Items such as tents and clear dividers have made visitation safer. If you are a nursing home that has not yet applied for this funding and is interested in doing so, please complete the application and submit it as soon as possible.

CMS has developed the COVID-19 In-Person Visitation Aids Request Application Template for the use of CMP Reinvestment funds to provide nursing homes with in-person visitation aids, such as tents and clear dividers. When completing the application, be sure to include any shipping and handling costs, taxes, and installation costs on the application as we can only reimburse expenses that have been approved. The total of all costs cannot exceed \$3,000 per facility. Please review the application and the FAQs carefully prior to completing the application.
