

TBI Panel Symposium

Diagnosing, Treating, and Thriving with Traumatic Brain Injuries

May 18th, 2017 | 1PM till 8PM
EWU Spokane, SEWC 122 (Auditorium),

Keynote 6PM

Dr. Maureen Schmitter-Edgecombe, Ph.D.

Free Admittance | Open to the Public

Traumatic Brain Injuries (TBI) are the leading cause of impairment in the United States, with a reported 2.2 million emergency department visits, 280k hospitalizations, and 50k deaths attributed to a TBI in a given year. The repercussions of such an injury can be far-reaching and devastating to an individual and their loved ones.

The TBI Panel Symposium intends to educate students, professionals, and relevant populations about vital topics concerning TBI, for the betterment of professional and public awareness. Faculty members from the Eastern Washington University Departments of Psychology, Social Work, Communication Disorders, and Disability Studies are presenting, in addition to a TBI Survivor Panel.

The keynote speech and the main panel presentation will consist of expert faculty from Eastern Washington University, Washington State University, and professionals practicing in the Spokane area in an open discussion format with a Q&A segment.
