Providing and Documenting Medically Necessary Behavioral Health Services
Part Three: Progress Notes
April 10, 2017

Developed by:
David Reed, Office Chief, Division of Behavioral Health and Recovery
Marc Bollinger, LISCW, CEO, Great Rivers BHO
Crystal Didier, MEd, Qualis Health
Kathy Robertson, MSW, CCO, Great Rivers BHO
Webinar Controls

• It is always a good idea to close other windows while viewing the webinar.

• Be sure to enter the telephone code, if you haven’t already.

• For problems during the webinar, please contact us using the chat box on the right side of your screen.
Webinar Controls

- **Attendee List** - Displays all the participants in-session
- **Grab Tab** – Allows you to open/close the Control Panel, mute/unmute your audio (if the organizer has enabled this feature) and raise your hand
- **Audio pane** – Displays audio format. Click Settings to select telephone devices.
- **Questions panel** – Allows attendees to submit questions and review answers (if enabled by the organizer). Broadcast messages from the organizer will also appear here.
Objectives

At the end of this session you should be able to:

🔹 Identify Medicaid documentation rules

🔹 Explain that services rendered must be well documented and that documentation lays the foundation for all coding and billing

🔹 Understand the term “Medical Necessity”

🔹 Describe the components of Effective Document of Medical Necessity:
  ■ Assessment
  ■ Planning Care
  ■ Documenting Services

🔹 Identify key elements to avoid repayment and other consequences
Goals

◆ Participant will become familiar with Medicaid documentation rules.

◆ Participant will discover the importance of complete and detailed documentation as the foundation for coding, billing and quality of care for the client.

◆ Participant will learn how insufficient documentation leads to both poor client care and to improper payments.
The Golden Thread

It is the Practitioner's responsibility to ensure that medical necessity is firmly established and that The Golden Thread is easy to follow within your documentation.
Medical Necessity

- Requires that all services/interventions be directed at a medical problem/diagnosis and be necessary in order that the service can be billed

- A claims based model that requires that each service/encounter, on a *stand alone basis, reflects the necessity for that treatment intervention

* Stand alone means information in the service note should include pertinent past clinical information, dealing with the issue at hand, and making plans for future care such as referrals or follow up, based upon the care plan. Each service note needs to stand-alone completely.
Why Document Medical Necessity?

Documentation is an important aspect of client care and is used to:

- Coordinate services and provides continuity of care among practitioners
- Furnish sufficient services
- Improve client care – provides a clinical service map
- Comply with regulations (Medicaid, Medicare and other Insurance)
- Support claims billed
- Reduce improper payments
- Medical record is a legal document
Tests for Medical Necessity

- There must be a diagnosis: ICD 10
- The services ordered are considered reasonable and effective for the diagnosis
  - Directed at or relate to the symptoms of that diagnosis
  - Will make the symptoms or persons functioning get better or at least, not get worse
- The ordered services are covered under that person’s benefit package (State Plan Services)
Golden Thread

Assessment & Diagnosis

Behavioral Health Assessment:
- Diagnosis
- Symptoms
- Functional Skill
- Resource Deficits

ISP
Goals/objectives
- Services (right diagnosis, right place, right time, right amount)

ISP review:
- Impact on symptoms – deficits (better or “not worse”)
- Services were provided as planned.

Progress notes
- Progress toward identified goals and/or objectives

Evaluation of Plan

Progress and Evaluation

Treatment Planning
The Golden Thread

- There are documented assessed needs
- Needs lead to specific goals
- There are treatment goals with measurable objectives
- There are specific interventions ordered by the practitioner
- Each intervention, is connected to the assessed need, ordered by the treatment plan, documents what occurred and the outcome
Difficulty Following The Golden Thread

Assessment Deficits
- Diagnosis poorly supported
- Symptoms, behaviors and deficits underlined
  - No baseline against which to determine progress or lack

Individual Service Plan/Care Plan
- Goals and objectives unrelated to assessed needs/symptoms/behaviors and deficits (example: “comply with treatment”)

Progress Notes
- Documents “conversations” about events or mini-crisis
- Does not assess behavior change, (i.e. progress toward a goal or objective)
- Does not spell out specifics of intervention(s) used in session.
Components of the Golden Thread

- Assessment
- Individual Service Plans (aka: Treatment plan, Care plan)
- Progress Notes
The Intake Assessment

- **Diagnosis with clinical rationale:** how the diagnostic criteria are present in the person’s life
  - Based on presenting problem (Reflect an understanding of unmet needs relating to symptoms and behaviors)
  - Data from client—their story and the client’s desired outcome
  - Observation

- **Safety or risks**

- **Client functioning**
  - Evidence that the diagnosis/client condition, causes minimally, moderate distress or functional impairment in Life Domains

- **Recommendation for treatment and level of care.**
Individual Service (Treatment) Plan

A Quality Plan should:

- be linked to needs identified in the assessment
- include desired outcomes relevant to the presenting problems and symptoms and utilize client’s words (How client knows when they are ready for discharge)
- have a clear goal statement
- include measurable objectives (how will practitioner and client know when an objective is accomplished)
- use client strengths and skills as resources
- clearly describe interventions and service types
- identify staff and staff type. (The staff should be qualified to deliver the care)
- address frequency and duration of interventions
Progress Notes

Progress notes must reflect the providers delivery of services, according to the nature, frequency, and intensity ‘prescribed’ in the treatment plan. Progress notes back up specific claims & justify payment.

Progress notes provide evidence of:
- The covered service delivered
- The Individual’s active participation
- Progress toward the goals and objectives
- On-going analysis of treatment strategy and needed adjustment
- Continued need for services (medical necessity)
Progress Notes continued

- Must be written for each encounter
- Must address the goals and objectives of the treatment plan
- Must document the intervention via the services ordered by the treatment plan
- Services not tied to the treatment plan need to be clearly identified.
  - Rule of 3 – If a service not on the treatment plan occurs more than 3 times it must be added to the treatment plan
  - “intervention is not part of the treatment plan”
- If different services are needed: plan must be revised
Progress Note Elements

- Date of Service
- Start time and duration
- Goal and/or objective
- Location of service
- Service code (local or CPT/HCPCS)
- Medical necessity (purpose of encounter)
- States the intervention(s) used: techniques targeted to achieve the outcomes provider is looking for
  - More specific than just “individual therapy”
- Assessment and clinical impression
Progress Note Elements continued

◆ Client response to the intervention
  ■ Were they able to demonstrate the skill or participate in role playing?; Could they list how to apply the skills being taught? Or did they not get it, refuses to participate, resist, etc.

◆ Plan for next interaction

◆ Optional: homework assignment or other task to complete before the next visit

◆ Note must be legible

◆ Legible signature of the provider

◆ Date the actual progress note was completed
Examples
Example 1:

<table>
<thead>
<tr>
<th>Date: 08/01/2015</th>
<th>Start time: 1:30pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Location: 99-other place of service</td>
<td>Duration: 240 min</td>
</tr>
<tr>
<td>Provider type: 05- Below Master’s Degree</td>
<td>Code: H0004- behavioral health counseling and therapy</td>
</tr>
</tbody>
</table>

- **Progress note:** Went to the clients home to provide additional support because the client was refusing to go on the family vacation.
- **Assessment:** client was open to the idea and was respectful.

- **What are the key elements of the progress note present?**
Answer to Example 1:

Key Elements with the Progress Note:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Medical Necessity</td>
<td>Not provided</td>
</tr>
<tr>
<td>Intervention</td>
<td>Not clear what “additional support” was provided</td>
</tr>
<tr>
<td>Individual Voice</td>
<td>Not provided</td>
</tr>
<tr>
<td>Individual Response</td>
<td>Not clear (open to idea – not sure what idea?)</td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td>Not provided</td>
</tr>
<tr>
<td>Progress</td>
<td>Not provided</td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td>No plan identified</td>
</tr>
</tbody>
</table>

Note did not identify the management, reduction or resolution of the identified problems.
Documentation does not contain a clinical intervention and does not support counseling and therapy
Example 2:

<table>
<thead>
<tr>
<th>Date</th>
<th>08/25/2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start time</td>
<td>1:30pm</td>
</tr>
<tr>
<td>Location</td>
<td>99-other place of service</td>
</tr>
<tr>
<td>Duration</td>
<td>55 minutes</td>
</tr>
<tr>
<td>Provider type</td>
<td>4- MA/Ph.D</td>
</tr>
<tr>
<td>Code</td>
<td>90847- Family Therapy with Individual</td>
</tr>
</tbody>
</table>

• **Progress note:** Joe’s mother, Sally, reports that she offered choices (a parenting technique from last week’s session) in order to set limits with Joe on two occasions this week, instead of previous practice of yelling at Joe. She reports that Joe was able to make a “good choice” (i.e., not have an angry outburst) on one of these occasions, which represents an improvement as Joe previously “almost never” made a “good choice” per Sally. Sally agreed to continue trying to remember to offer Joe choices instead of yelling this coming week, say she will attempt to offer choices three times. Reviewed with Joe and Sally reciprocal trust and security for both Joe and Sally as they continue to develop a more mutually responsive relationship. We also reviewed several behavioral observations which indicate behavioral triggers for Joe, e.g. being late for pick up, eating a late dinner and brushing teeth. Practitioner reframed the behavioral observations for Sally towards understanding that Joe is communicating his fear and possible anxiety and his outbursts are a function of his desire for getting his needs met. Next session we will continue to build on sustainable relationships and behavior identification.

• **What are the key elements of the progress note present?**

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td></td>
</tr>
<tr>
<td>Individual Voice</td>
<td></td>
</tr>
<tr>
<td>Individual Response</td>
<td></td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td></td>
</tr>
<tr>
<td>Progress</td>
<td></td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td></td>
</tr>
</tbody>
</table>
Answers to Example 2:

### Key Elements with the Progress Note:

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th>Anxiety/anger outburst</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td>Reframing. Reviewed behavioral observations which indicate behavioral triggers for Joe</td>
</tr>
<tr>
<td>Individual Voice</td>
<td>Report of making good choices: “almost never” “good choice” (mother reports improvement)</td>
</tr>
<tr>
<td>Individual Response</td>
<td>Agreement improvement and to continue offering choices technique</td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td>Offering choices (parenting techniques) – setting limits</td>
</tr>
<tr>
<td>Progress</td>
<td>Improvement note (making good choice)</td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td>Next session will continue to build on sustainable relationships and behavioral identification.</td>
</tr>
</tbody>
</table>
Example 3:

<table>
<thead>
<tr>
<th>Date</th>
<th>Start time: 7:45pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Location</td>
<td>23- Emergency room hospital</td>
</tr>
<tr>
<td>Duration</td>
<td>255 min</td>
</tr>
<tr>
<td>Provider type</td>
<td>4- MA/Ph.D</td>
</tr>
<tr>
<td>Code</td>
<td>90847- family psychotherapy with patient present</td>
</tr>
</tbody>
</table>

• **Progress note**: Safety and determining stay location after discharge from ED. Staff met family at the Emergency Room after they called and said that client tried to grab a knife and cut himself and go after family members. Family members stated that they were done a month ago but that today was the last straw. They are scared for family safety. They do not want to have him home. Staff will look into short term stay location for him and will check in on him tomorrow.

• **What are the key elements of the progress note present?**

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td></td>
</tr>
<tr>
<td>Individual Voice</td>
<td></td>
</tr>
<tr>
<td>Individual Response</td>
<td></td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td></td>
</tr>
<tr>
<td>Progress</td>
<td></td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td></td>
</tr>
</tbody>
</table>
### Key Elements with the Progress Note:

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th>Identified a high risk factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td>No intervention provided – except statement of seeking short term stay location</td>
</tr>
<tr>
<td>Individual Voice</td>
<td>Not provided – not sure if client was present</td>
</tr>
<tr>
<td>Individual Response</td>
<td>Not provided – not provided for family either</td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td>Not Provided</td>
</tr>
<tr>
<td>Progress</td>
<td>Not Provided</td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td>Check in tomorrow is not a plan for the individual nor does it state what will transpire.</td>
</tr>
</tbody>
</table>

Note reflects the family input into the individual presentation, identified concerns and family dynamics as they relate to the patient’s mental status and behavior may have been the focus of the session, but is unclear. Attention was given to the impact the patient’s condition has on the family, but it did not address the therapy aimed at improving the interaction between the patient and family members and for 255 minutes more treatment elements should have been identified. Is not family therapy. Due to lack of content, we cannot determine what this service should have been coded as.
Example 4:

Date: 06/02/2015
Start time: 9:00 a.m.
Location: 99-other place of service
Duration: 30 minutes
Provider type: 4- MA/Ph.D
Code: H2015 CCSS

• **Progress note**: Sally Smith, Jane’s assigned probation officer (PO), Jane and I reviewed Jane’s probation guidelines at clinician’s office. Group explored Jane’s perception of her guidelines (i.e. her frustration that she receives a probation violation each time she leaves the house without her foster parent’s permission) and this appears to frequently trigger Jane’s anger and often results in violent behavior. We all discussed how altering Jane’s probation guidelines and leaving out the recommendation for a probation violation each time she leaves the home without permission might reduce some of her unsafe behavior at home. Jane was in agreement with this potential change, ‘I want to go hang out with my friend and not get in trouble’. Jane will discuss some options with PO over the next week and review the outcomes with therapist at next session. Jane seemed enthusiastic about a possible positive outcome, ‘I will go home right away and write down the plan I want to discuss’.

• **What are the key elements of the progress note present?**

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td></td>
</tr>
<tr>
<td>Individual Voice</td>
<td></td>
</tr>
<tr>
<td>Individual Response</td>
<td></td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td></td>
</tr>
<tr>
<td>Progress</td>
<td></td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td></td>
</tr>
</tbody>
</table>
### Key Elements with the Progress Note:

<table>
<thead>
<tr>
<th>Medical Necessity</th>
<th>Frequent triggers of anger and violent behavior</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td>Explored perception of Probation Guidelines, discussed alternatives to reduce unsafe behavior at home</td>
</tr>
<tr>
<td>Individual Voice</td>
<td>‘I will go home right away and write down the plan....”</td>
</tr>
<tr>
<td>Individual Response</td>
<td>Jane was in agreement and plan to participate in development of plan</td>
</tr>
<tr>
<td>Objective/Link to ISP</td>
<td>Reviewed Jane’s probation guidelines/anger outburst</td>
</tr>
<tr>
<td>Progress</td>
<td>Enthusiastic about possible outcome – goal to reduce anger outburst and unsafe behavior</td>
</tr>
<tr>
<td>Plan/Next Steps</td>
<td>Jane will discuss options with PO and discuss at next session</td>
</tr>
</tbody>
</table>
Amending and Appending Documentation

Behavioral Health Organizations and Behavioral Health Agencies must have a policy that outlines how amending and appending documentation can be completed that include:

- When and how to add and modify documentation
- Must be dated
- Indicate who made the modification
- What the modification included
- Reason for the modification
Amending and Appending Documentation

Late entries, addendums, or corrections to a medical record are legitimate occurrences in documentation of clinical services. A late entry, an addendum or a correction to the medical record, bears the current date of that entry and is signed by the person making the addition or change.

Noridian Health Solutions 2016
Amending and Appending Documentation - Late Entry

**Late Entry**: A late entry supplies additional information that was omitted from the original entry. The late entry **bears the current date**, is added as soon as possible, is written only if the person documenting has total recall of the omitted information and **signs** the late entry.

Example: A **late entry** following supervision review of a note might add additional information about the service provided "The services was provided in the families home with the mother (Jane Doe) and father (Jon Doe) present. Marc Dollinger, LISCW, MD 06/15/09“
Amending and Appending Documentation - Addendum

**Addendum:** An addendum is used to provide information that was not available at the time of the original entry. The addendum should also be timely and bear the current date and reason for the addition or clarification of information being added to the medical record and be signed by the person making the addendum.

- Would typically be used with an E&M code to input additional clinical or medical information, such as lab results.

Noridian Health Solutions 2016
Amending and Appending Documentation - Correction

**Correction:** When making a correction to the medical record, never write over, or otherwise obliterate the passage when an entry to a medical record is made in error. Draw a single line through the erroneous information, keeping the original entry legible. Sign or initial and date the deletion, stating the reason for correction above or in the margin. Document the correct information on the next line or space with the current date and time, making reference back to the original entry.

- Correction of electronic records should follow the same principles of tracking both the original entry and the correction with the current date, time, reason for the change and initials of person making the correction. When a hard copy is generated from an electronic record, both records must show the correction. Any corrected record submitted must make clear the specific change made, the date of the change, and the identity of the person making that entry.

Noridian Health Solutions 2016
What to do if you have questions

- Clinicians should discuss questions with their supervisors
- Supervisors should discuss with their BHA Quality Managers
- BHA quality managers should discuss with the BHO Quality Manager
- BHO quality manager can email the SERI workgroup: cpt-seriinquiries@dshs.wa.gov
Again

Why follow the Golden Thread?

To ensure quality of client care and better outcomes

Possible Consequences from audits:

- Loss of employment
- Repayment of funds
- Fines
- Criminal charges
- Loss of contract
- Loss of ability to do business with Medicare and Medicaid

Avoid “Improper payments” caused by:

- Missing documentation
- Incomplete documentation
- Wrong codes for services
- Services not covered by Medicaid
Questions?
Remember:

It is the Practitioner's responsibility to ensure that medical necessity is firmly established and that The Golden Threat is easy to follow within your documentation.
