## **ANNUAL SYNAR REPORT**

**42 U.S.C. 300x-26** OMB № 0930-0222

**FFY 2016** 

**State: WA** 

### **Table of Contents**

Introduction	i
FFY 2016: Funding Agreements/Certifications	1
Section I: FFY 2015 (Compliance Progress)	2
Section II: FFY 2016 (Intended Use)	10
Appendix A: Forms 1–5	11
Appendixes B & C: Forms.	18
Appendix B: Synar Survey Sampling Methodology	19
Appendix C: Synar Survey Inspection Protocol	22
Appendix D: List Sampling Frame Coverage Study	25

OMB No. 0930-0222

Expiration Date: 05/31/2016

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0222. Public reporting burden for this collection of information is estimated to average 18 hours per respondent, per year, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 1 Choke Cherry Road, Room 2-1057, Rockville, Maryland, 20857.

#### INTRODUCTION

The Annual Synar Report (ASR) format provides the means for states to comply with the reporting provisions of the Public Health Service Act (42 U.S.C. 300x-26) and the Tobacco Regulation for the Substance Abuse Prevention and Treatment Block Grant (SABG) (45 C.F.R. 96.130 (e)).

#### How the Synar report helps the Center for Substance Abuse Prevention

In accordance with the tobacco regulations, states are required to provide detailed information on progress made in enforcing youth tobacco access laws (FFY 2015 Compliance Progress) and future plans to ensure compliance with the Synar requirements to reduce youth tobacco access rates (FFY 2016 Intended Use Plan). These data are required by 42 U.S.C. 300x-26 and will be used by the Secretary to evaluate state compliance with the statute. Part of the mission of the Center for Substance Abuse Prevention (CSAP) is to assist states by supporting Synar activities and providing technical assistance helpful in determining the type of enforcement measures and control strategies that are most effective. This information is helpful to CSAP in improving technical assistance resources and expertise on enforcement efforts and tobacco control program support activities, including state Synar program support services, through an enhanced technical assistance program involving conferences and workshops, development of training materials and guidance documents, and onsite technical assistance consultation.

#### How the Synar report can help states

The information gathered for the Synar report can help states describe and analyze substate needs for program enhancements. These data can also be used to report to the state legislature and other state and local organizations on progress made to date in enforcing youth tobacco access laws when aggregated statistical data from state Synar reports can demonstrate to the Secretary the national progress in reducing youth tobacco access problems. This information will also provide Congress with a better understanding of state progress in implementing Synar, including state difficulties and successes in enforcing retailer compliance with youth tobacco access laws.

<sup>&</sup>lt;sup>1</sup>The term "state" is used to refer to all the states and territories required to comply with Synar as part of the Substance Abuse Prevention and Treatment Block Grant Program requirements (42 U.S.C. 300x-64 and 45 C.F.R. 96.121).

#### Getting assistance in completing the Synar report

If you have questions about programmatic issues, you may call CSAP's Division of State Programs at (240) 276-2550 and ask for your respective State Project Officer, or contact your State Project Officer directly by telephone or email. If you have questions about fiscal or grants management issues, you may call the Grants Management Officer, Office of Financial Resources, Division of Grants Management, at (240) 276-1422.

#### Where and when to submit the Synar report

The ASR must be received by SAMHSA no later than December 31, 2015 and must be submitted in the format specified by these instructions. Use of the approved format will avoid delays in the review and approval process. The chief executive officer (or an authorized designee) of the applicant organization must sign page one of the ASR certifying that the state has complied with all reporting requirements.

The state must upload one copy of the ASR using the online WebBGAS (Block Grant Application System). In addition, the following items must be uploaded to WebBGAS:

- FFY 2016 Synar Survey Results: States that use the Synar Survey Estimation System (SSES) must upload one copy of SSES Tables 1–5 (in Excel) to WebBGAS. States that do not use SSES must upload one copy of ASR Forms 1, 4, and 5, and Forms 2 and 3, if applicable, (in Excel) to WebBGAS.
- Synar Inspection Form: States must upload one blank copy of the inspection form used to record the result of each Synar inspection.
- Synar Inspection Protocol: States must upload a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections.
- A scanned copy of the signed Funding Agreements/Certifications

Each state SSA Director has been emailed a login ID and password to log onto the Synar section of the WebBGAS site.

Additionally, the state must submit one signed original of the report (including the signed Funding Agreements/Certifications), as well as one additional copy of the signed Funding Agreements/Certifications, to the Grants Management Officer at the address below:

Grants Management Officer
Division of Grants Management
Office of Financial Resources
Substance Abuse and Mental Health Services Administration

#### Regular Mail:

#### **Overnight Mail:**

1 Choke Cherry Road, Rm.7-1091 Rockville, Maryland 20857 1 Choke Cherry Road, Rm.7-1091 Rockville, Maryland 20850

#### FFY 2016: FUNDING AGREEMENTS/CERTIFICATIONS

The following form must be signed by the Chief Executive Officer or an authorized designee and submitted with this application. Documentation authorizing a designee must be attached to the application.

#### PUBLIC HEALTH SERVICES ACT AND SYNAR AMENDMENT

42 U.S.C. 300x-26 requires each state to submit an annual report of its progress in meeting the requirements of the Synar Amendment and its implementing regulation (45 C.F.R. 96.130) to the Secretary of the Department of Health and Human Services. By signing below, the chief executive officer (or an authorized designee) of the applicant organization certifies that the state has complied with these reporting requirements and the certifications as set forth below.

#### SYNAR SURVEY SAMPLING METHODOLOGY

The state certifies that the Synar survey sampling methodology on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2016 is up-to-date and approved by the Center for Substance Abuse Prevention.

#### SYNAR SURVEY INSPECTION PROTOCOL

The state certifies that the Synar Survey Inspection Protocol on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2016 is up-to-date and approved by the Center for Substance Abuse Prevention.

## **SECTION I: FFY 2015 (Compliance Progress)**

## YOUTH ACCESS LAWS, ACTIVITIES, AND ENFORCEMENT

42 U.S.C. 300x-26 requires the states to report information regarding the sale/distribution of tobacco products to individuals under age 18.

1.	access so	ndicate any changes or additions to the state tobacco statute(s) relating to youth ince the last reporting year. If any changes were made to the state law(s) since reporting year, please attach a photocopy of the law to the hard copy of the d also upload a copy of the state law to WebBGAS. (see 42 U.S.C. 300x-26).
	a.	Has there been a change in the minimum sale age for tobacco products?
		☐ Yes ⊠ No
		If <b>Yes</b> , current minimum age: 19 20 21
	b.	Have there been any changes in state law that impact the state's protocol for conducting <i>Synar inspections?</i>
		☐ Yes ⊠ No
		If Yes, indicate change. (Check all that apply.)  Changed to require that law enforcement conduct inspections of tobacco outlets  Changed to make it illegal for youth to possess, purchase or receive tobacco  Changed to require ID to purchase tobacco  Other change(s) (Please describe.)
	c.	Have there been any changes in state law that impact the following?
		Licensing of tobacco vendors
		Penalties for sales to minors Vending machines  Yes No No
2.	42 U.S.C	e how the Annual Synar Report (see 45 C.F.R. 96.130(e)) and the state Plan (see C. 300x-51) were made public within the state prior to submission of the ASR. all that apply.)
		Placed on file for public review
	wh	Posted on a state agency Web site ( <i>Please provide exact Web address and the date ten the FFY 2016 ASR was posted to this Web address.</i> )  p://www.theathenaforum.org/synar_report_ffy16 - posted 12.29.15
		Notice published in a newspaper or newsletter
		Public hearing
		Announced in a news release, a press conference, or discussed in a media interview
	$\boxtimes$	Distributed for review as part of the SABG application process
		Distributed through the public library system
		Published in an annual register

		Other (Please describe.)
3.	Identify	the following agency or agencies (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).
	a.	The state agency (ies) designated by the Governor for oversight of the Synar requirements:
		Division of Behavioral Health and Recovery (DBHR)
		Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
	b.	The state agency(ies) responsible for conducting random, unannounced Synar inspections:
		Washington State Department of Health (DOH).
		Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
	c.	The state agency(ies) responsible for enforcing youth tobacco access law(s):
		Washington State Liquor Cannibis Board (LCB)
		Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
	•	the following agencies and describe their relationship with the agency ible for the oversight of the Synar requirements.
	a.	Identify the state agency responsible for tobacco prevention activities (the agency that receives the Centers for Disease Control and Prevention's National Tobacco Control Program funding).  Washington State Department of Health(DOH)
	<b>b.</b>	Has the responsible agency changed since last year's Annual Synar Report?  ☐ Yes ☐ No
	с.	Describe the coordination and collaboration that occur between the agency responsible for tobacco prevention and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies
		Are the same
		Have a formal written memorandum of agreement
		Have an informal partnership
		Conduct joint planning activities
		<ul> <li>☐ Combine resources</li> <li>☐ Have other collaborative arrangement(s) (Please describe.)</li> </ul>

	d.	Identify the state agency responsible for enforcing the youth access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act (the agency that is under contract to the Food and Drug Administration's Center for Tobacco Products (FDA/CTP)).  Washington State Liquor Cannibis Board
	e.	Has the responsible agency changed since last year's Annual Synar Report?  ☐ Yes ☐ No
	f.	Describe the coordination and collaboration that occur between the agency contracted with the FDA to enforce federal youth tobacco access laws and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies:
		Are the same
		Have a formal written memorandum of agreement
		Have an informal partnership
		Conduct joint planning activities
		Combine resources
		Have other collaborative arrangement(s) ( <i>Please describe</i> .)
	g.	Does the state use data from the FDA enforcement inspections for Synar survey reporting?
5.		Inswer the following questions regarding the state's activities to enforce the routh access to tobacco law(s) in FFY 2015 (see 42 U.S.C. 300x-26 and 45 C.F.R. e)).
	a.	Which one of the following describes the enforcement of state youth access to tobacco laws carried out in your state? (Check one category only.)
		☐ Enforcement is conducted exclusively by local law enforcement agencies.
		Enforcement is conducted exclusively by state agency (ies).
		Enforcement is conducted by both local <i>and</i> state agencies.

b. The following items concern penalties imposed for all violations of state youth access to tobacco laws by <u>LOCAL AND/OR STATE LAW ENFORCEMENT AGENCIES</u> (this does not include enforcement of federal youth tobacco access <u>laws</u>). Please fill in the number requested. If state law does not allow for an item, please mark "NA" (not applicable). If a response for an item is unknown, please mark "UNK." The chart must be filled in completely.

PENALTY	OWNERS	CLERKS	TOTAL
Number of citations issued	202	179	381
Number of fines assessed	198	179	377
Number of permits/licenses suspended	4		4
Number of permits/licenses revoked	0		0
Other (Please describe.)	N/A	N/A	N/A

<b>:</b> .	Which one of the following best describes the level of enforcement of state youth access to tobacco laws carried out in your state? (Check one category only.)
	☐ Enforcement is conducted only at those outlets randomly selected for the Synar survey.
	☐ Enforcement is conducted only at a subset of outlets not randomly selected for the Synar survey.
	Enforcement is conducted at a combination of outlets randomly selected for the Synar survey and outlets not randomly selected for the Synar survey.
d.	Did every tobacco outlet in the state receive at least one compliance check that included enforcement of the state youth tobacco access law(s) in the last year?
	☐ Yes ⊠ No
е.	What additional activities are conducted in your state to support enforcement and compliance with state youth tobacco access law(s)? (Check all that apply.)
	<ul> <li>☑ Merchant education and/or training</li> <li>☑ Incentives for merchants who are in compliance (e.g., nonenforcement compliance checks in which compliant retailers are given positive reinforcement and noncompliant retailers are warned about youth access laws)</li> <li>☑ Community education regarding youth access laws</li> <li>☑ Media use to publicize compliance inspection results</li> <li>☑ Community mobilization to increase support for retailer compliance with youth access laws</li> <li>☑ Other activities (<i>Please list.</i>)</li> </ul>
	Briefly describe all checked activities:
	Merchant Education: Liquor Cannibis Board delivers merchant education programs to both store owners and their clerks. The education programs cover both alcohol and tobacco licensing requirements

Incentives: Local contractors for the Department of Health provided letters of recognition, engraved placards and public press releases, recognizing their efforts in decreasing tobacco sales to youth.

Community Education: Local contractors for the Department of Health deliver multiple community education programs regarding youth access and other tobacco related issues.

Media: The Department of Health does not have master settlement agreement dollars to conduct their work, therefore, Tobacco Prevention Control specialist must rely upon earned media presence to get news stories placed in the media using state funds.

f. Are citations or warnings issued to retailers or clerks who sell tobacco to minors for inspections that are part of the Synar survey?

<b>Yes</b> N
--------------

If "Yes" to 5f, please describe the state's procedure for minimizing risk of bias to the survey results from retailers alerting each other to the presence of the survey teams:

Referrals are made by the Department of Health to the Liquor Cannibis Board (LCB) for any completed sales (for enforcement purposes). If the sale is made in an urban area, LCB or local law enforcement will write the citation at the time of the sale. If a sale is made in a rural area the compliance check team will complete all of its checks for that particular day. Once the checks are complete, they will go back to the store(s) that sold the tobacco and either LCB or law enforcement will write the citation. If the compliance check team does not have an enforcement officer with them, the retailer will be notified by the team leader that a sale was made earlier in the day to an underage youth and LCB will be issuing them a citation.

#### SYNAR SURVEY METHODS AND RESULTS

The following questions pertain to the survey methodology and results of the Synar survey used by the state to meet the requirements of the Synar Regulation in FFY 2015 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).

6.	Has the	sampling method	ology o	changed f	from th	e previous	year?		
	☐ Yes	⊠ No							
	methodo Methodo	e is required to have blogy on file with Co blogy (Appendix B) g year, these chang	SAP. P . If the	lease sub sampling	mit a co method	ppy of your l lology chan	Synar Sur ged from	vey Samp the previ	oling
7.		nswer the followin inced inspections (	_	_	_				
	a.	Did the state use analyze the Syna	_	•	nar Su	rvey Estim	ation Sys	tem (SSI	ES) to
		<b>⊠</b> Yes □ No							
		If <b>Yes</b> , attach SSI upload a copy of If <b>No</b> , continue to	SSES 1	tables 1–5					
	b. Report the weighted and unweighted Retailer Violation Rate (RVR) estimat the standard error, accuracy rate (number of eligible outlets divided by the total number of sampled outlets), and completion rate (number of eligible outlets inspected divided by the total number of eligible outlets).							d by the	
		Unweighted RVI	R						
		Weighted RVR				_			_
		Standard error (	s.e.) of	the (wei	ghted) l	RVR _			
		Fill in the blanks interval.	to cal	culate the	e <u>right</u> l	<u>imit</u> of the	right-sid	ed 95%	confidence
		RVR Estimate	+ plus	(1.645 (1.645	× times	Standard	) Error )	= equals	Right Limit
		Accuracy rate							
		Completion rate							

c.	Fill out Form 1 in Appendix A (Forms 1–5). (Required regardless design.)	s of the sample					
d.	How were the (weighted) RVR estimate and its standard error of (Check the one that applies.)	btained?					
	☐ Form 2 (Optional) in Appendix A (Forms 1–5) (Attach completed Form 2.) ☐ Other (Please specify. Provide formulas and calculations or attach and explain the program code and output with description of all variable names.)						
	N/A						
e.	If stratification was used, did any strata in the sample contain or cluster this year?	nly one outlet					
	☐ Yes ☐ No ☐ No stratification						
	If Yes, explain how this situation was dealt with in variance estimate	ion.					
	N/A						
f.	Was a cluster sample design used?						
	☐ Yes ☐ No						
	If <b>Yes</b> , fill out and attach Form 3 in Appendix A (Forms 1–5), and answer the following question.						
	If No, go to Question 7g.						
	Were any certainty primary sampling units selected this year?						
	☐ Yes ☐ No						
	If Yes, explain how the certainty clusters were dealt with in variance estimation.						
	N/A						
g.	Report the following outlet sample sizes for the Synar survey.						
		Sample Size					
Ш	Effective sample size (sample size needed to meet the SAMHSA precision equirement assuming simple random sampling)						
	<b>Carget sample size</b> (the product of the effective sample size and the design ffect)						
	<b>Driginal sample size</b> (inflated sample size of the target sample to counter the ample attrition due to ineligibility and noncompletion)						
F	Cligible sample size (number of outlets found to be eligible in the sample)						
	<b>Sinal sample size</b> (number of eligible outlets in the sample for which an aspection was completed)						

h. Fill out Form 4 in Appendix A (Forms 1–5).

8.	Did the	state's Synar survey use a list frame?
	<b>⊠</b> Yes	□No
	If Yes, a	nswer the following questions about its coverage.
	a.	The calendar year of the latest frame coverage study: 2015
	<b>b.</b>	Percent coverage from the latest frame coverage study: 92.6%
	c.	Was a new study conducted in this reporting period?
		⊠Yes □ No
		If <b>Yes</b> , please complete Appendix D (List Sampling Frame Coverage Study) and submit it with the Annual Synar Report.
	d.	The calendar year of the next coverage study planned: 2020
9.	Has the	Synar survey inspection protocol changed from the previous year?
	Yes Yes	⊠ No
	protocol (Append	e is required to have an approved up-to-date description of the Synar inspection on file with CSAP. Please submit a copy of your Synar Survey Inspection Protocol (ix C). If the inspection protocol changed from the previous year, these changes must exted in the protocol submitted.
	a.	Provide the inspection period: From 12-1-2014 to 06-30-2015 MM/DD/YY MM/DD/YY
	b.	Provide the number of youth inspectors used in the current inspection year:
		<u>48</u>
		NOTE: If the state uses SSES, please ensure that the number reported in 9b matches that reported in SSES Table 4, or explain any difference.
	b.	Fill out and attach Form 5 in Appendix A (Forms 1–5). (Not required if the state used SSES to analyze the Synar survey data.)

## **SECTION II: FFY 2016 (Intended Use):**

Public law 42 U.S.C. 300x-26 of the Public Health Service Act and 45 C.F.R. 96.130 (e) (4, 5) require that the states provide information on future plans to ensure compliance with the Synar requirements to reduce youth tobacco access.

1. In the upcoming year, does the state anticipate any changes in:

	Synar sampling methodology
	If changes are made in either the Synar sampling methodology or the Synar inspection protocol, the state is required to obtain approval from CSAP prior to implementation of the change and file an updated Synar Survey Sampling Methodology (Appendix B) or an updated Synar Survey Inspection Protocol (Appendix C), as appropriate.
2.	Please describe the state's plans to maintain and/or reduce the target rate for Synar inspections to be completed in FFY 2016. Include a brief description of plans for law enforcement efforts to enforce youth tobacco access laws, activities that support law enforcement efforts to enforce youth tobacco access laws, and any anticipated changes in youth tobacco access legislation or regulation in the state.
	It is the anticipation of the Department of Health (DOH), the Division of Behavioral Health and Recovery (DBHR), substance abuse and tobacco contractors, and the collaborating communities that their efforts will drive down the annual Retail Violation Rates (RVR).
	The state will continue with compliance checks by the LCB as part of its enforcement responsibilities. Youth access compliance checks by the DOH have been greatly reduced due to the depleted state's budget. The 35 local health jurisdictions traditionally contracted with the DOH are no longer required to have tobacco inspections a part of their contract.
	The partnership between the DOH and the DBHR historically has focused considerable energy and resources to expand efforts to affect change relating to the tobacco use and access rate of the Native American Tribes within Washington State. There are 29 Federally Recognized Native American Tribes within Washington State. DOH and DBHR contracted with the tribes to provide tobacco (and other drug) prevention services to their communities.
3.	Describe any challenges the state faces in complying with the Synar regulation. (Check all that apply.)
	<ul> <li>☐ Limited resources for law enforcement of youth access laws</li> <li>☐ Limited resources for activities to support enforcement and compliance with youth tobacco access laws</li> </ul>
	Limitations in the state youth tobacco access laws  Limited public support for enforcement of youth tobacco access laws  Limitations on completeness/accuracy of list of tobacco outlets  Limited expertise in survey methodology  Laws/regulations limiting the use of minors in tobacco inspections  Difficulties recruiting youth inspectors
	<ul> <li>Issues regarding the age balance of youth inspectors</li> <li>Issues regarding the gender balance of youth inspectors</li> </ul>

Geographic, demographic, and logistical considerations in conducting inspections	
Cultural factors (e.g., language barriers, young people purchasing for their elders)	
☐ Issues regarding sources of tobacco under tribal jurisdiction	
Other challenges ( <i>Please list.</i> )	

Briefly describe all checked challenges and propose a plan for each, or indicate the state's need for technical assistance related to each relevant challenge.

Limited resources for activities to support enforcement and compliance with youth tobacco access laws:

The forthcoming funding from the Food and Drug Administration will allow for dollars to specifically target youth access enforcement; we will be able to dedicate specific officers and specific time to the effort. Without specific funding, youth access enforcement is performed as part of the overall law enforcement job and can ultimately become overlooked.

PLAN: Continue to advocate that SAMHSA provide some allowance of federal SAPT Block Grant dollars to be allocated for enforcement purposes.

Geographic, demographic, and logistical considerations in conducting inspections:

Washington State has many lightly populated areas that require extensive time and resources in order to complete the checks.

PLAN: Continue to combine resources with Department of Health, Liquor Cannibis Board and DBHR in order to reach as many retailers as possible for education purposes, in conjunction with Synar compliance checks.

Cultural factors (e.g., language barriers, young people purchasing for their elders):

Washington State's population is quite diverse which includes immigrants who come from cultures where it is not unusual to smoke. Many sales to minors have come from stores owned and operated by immigrants not familiar with tobacco laws.

PLAN: Continue to work with the Korean Grocers Association, though resources for outreach are relatively non-existent, and advocate for change actively involved in trying to reduce youth access to tobacco. Also, continue to work with our county partners and local health jurisdictions to strategize how to address these areas and populations where youth smoking is the norm.

Issues regarding sources of tobacco under tribal jurisdiction:

There are 29 Federally Recognized Native American Tribes in Washington State. State Laws, including youth access and tobacco taxes among them, cannot be enforced on reservations. Though it is expressly forbidden for non-Indians to buy untaxed tobacco products from Indian tobacco outlets, enforcement is very awkward and inconsistent. The same situation exists with access by youth, though we do not know the extent of the problem of sales to minors through Native American outlets.

PLAN: Continue to work with tribes to research local tribal law concerning youth access to tobacco on tribal lands. If no policies exist, collaborate to identify the need to develop and implement enforceable policies. Continue to encourage and support those tribes that are examining their own policies relating to tobacco and youth access.

#### APPENDIX A: FORMS 1–5

## FORM 1 (Required for all states not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)

Complete Form 1 to report sampling frame and sample information and to calculate the unweighted retailer violation rate (RVR) using results from the current year's Synar survey inspections.

**Instructions for Completing Form 1:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2016). Provide the remaining information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

- Column 1: If stratification was used:
  - 1(a) Sequentially number each row.
  - 1(b) Write in the name of each stratum. All strata in the state must be listed.

If no stratification was used:

- 1(a) Leave blank.
- 1(b) Write "state" in the first row (indicates that the whole state is a single stratum).

Note for unstratified samples: For Columns 2–5, wherever the instruction refers to "each stratum," report the specified information for the state as a whole.

- Column 2: 2(a) Report the number of over-the-counter (OTC) outlets in the sampling frame in each stratum.
  - 2(b) Report the number of vending machine (VM) outlets in the sampling frame in each stratum.
  - 2(c) Report the combined total of OTC and VM outlets in the sampling frame in each stratum.
- Column 3: 3(a) Report the estimated number of eligible OTC outlets in the OTC outlet population in each stratum.
  - 3(b) Report the estimated number of eligible VM outlets in the VM outlet population in each stratum.
  - 3(c) Report the combined total estimated number of eligible OTC and VM outlets in the total outlet population in each stratum.

The estimates for Column 3 can be obtained from the Synar survey sample as the weighted sum of eligible outlets by outlet type.

- Column 4: 4(a) Report the number of eligible OTC outlets for which an inspection was completed, for each stratum.
  - 4(b) Report the numbers of eligible VM outlets for which an inspection was completed, for each stratum.
  - 4(c) Report the combined total of eligible OTC and VM outlets for which an inspection was completed, for each stratum.
- Column 5: 5(a) Report the number of OTC outlets found in violation of the law as a result of completed inspections, for each stratum.
  - 5(b) Report the number of VM outlets found in violation of the law as a result of completed inspections, for each stratum.
  - 5(c) Report the combined total of OTC and VM outlets found in violation of the law as a result of completed inspections, for each stratum.

Totals: For each subcolumn (a–c) in Columns 2–5, provide totals for the state as a whole in the last row of the table. These numbers will be the sum of the numbers in each row for the respective column.

FORM 1 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar Survey data.)

	Summary of Synar Inspection Results by Stratum  State:  FFY: 2016												
(	(1)		(2)		(3)				(4)			(5)	
STRATUM		NUMBER OF OUTLETS IN SAMPLING FRAME			ESTIMATED NUMBER OF ELIGIBLE OUTLETS IN POPULATION				NUMBER OF OUTLETS INSPECTED		NO. OF OUTLETS FOUND IN VIOLATION DURING INSPECTIONS		RING
(a) Row#	(b) Stratum Name	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (2a+2b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (3a+3b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (4a+4b)	(a) Over-the- Counter (OTC)	(b) Vending Machines (VM)	(c) Total Outlets (5a+5b)

RECORD COLUMN TOTALS ON LAST LINE (LAST PAGE ONLY IF MULTIPLE PAGES ARE NEEDED).

#### FORM 2 (Optional)

#### Appropriate for stratified simple or systematic random sampling designs.

Complete Form 2 to calculate the weighted RVR. This table (in Excel form) is designed to calculate the weighted RVR for stratified simple or systematic random sampling designs, accounting for ineligible outlets and noncomplete inspections encountered during the annual Synar survey.

**Instructions for Completing Form 2:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2016).

- Column 1: Write in the name of each stratum into which the sample was divided. These should match the strata reported in Column 1(b) of Form 1.
- Column 2: Report the number of outlets in the sampling frame in each stratum. These numbers should match the numbers reported for the respective strata in Column 2(c) of Form 1.
- Column 3: Report the original sample size (the number of outlets originally selected, *including* substitutes or replacements) for each stratum.
- Column 4: Report the number of sample outlets in each stratum that were found to be eligible during the inspections. Note that this number must be less than or equal to the number reported in Column 3 for the respective strata.
- Column 5: Report the number of eligible outlets in each stratum for which an inspection was completed. Note that this number must be less than or equal to the number reported in Column 4. These numbers should match the numbers reported in Column 4(c) of Form 1 for the respective strata.
- Column 6: Report the number of eligible outlets inspected in each stratum that were found in violation. These numbers should match the numbers reported in Column 5(c) of Form 1 for the stratum.
- Column 7: Form 2 (in Excel form) will automatically calculate the stratum RVR for each stratum in this column. This is calculated by dividing the number of inspected eligible outlets found in violation (Column 6) by the number of inspected eligible outlets (Column 5). The state unweighted RVR will be shown in the Total row of Column 7.
- Column 8: Form 2 (in Excel form) will automatically calculate the estimated number of eligible outlets in the population for each stratum. This calculation is made by multiplying the number of outlets in the sampling frame (Column 2) times the number of eligible outlets (Column 4) divided by the original sample size (Column 3). Note that these numbers will be less than or equal to the numbers in Column 2.
- Column 9: Form 2 (in Excel form) will automatically calculate the relative stratum weight by dividing the estimated number of eligible outlets in the population for each stratum in Column 8 by the Total of the values in Column 8.
- Column 10: Form 2 (in Excel form) will automatically calculate each stratum's contribution to the state weighted RVR by multiplying the stratum RVR (Column 7) by the relative stratum weight (Column 9). The weighted RVR for the state will be shown in the Total row of Column 10.
- Column 11: Form 2 (in Excel form) automatically calculates the standard error of each stratum's RVR (Column 7). The standard error for the state weighted RVR will be shown in the Total row of Column 11.
- TOTAL: For Columns 2–6, Form 2 (in Excel form) provides totals for the state as a whole in the last row of the table. For Columns 7–11, it calculates the respective statistic for the state as a whole.

FORM 2 (Optional) Appropriate for stratified simple or systematic random sampling designs.

#### **Calculation of Weighted Retailer Violation Rate State: FFY:** 2016 (4) (8) (10)(2) N'=N(n1/n)n1 (7) (9) pw p=x/n2N Number of (5) (6) Estimated w=N'/Total Stratum (11)Number of Sample n2 Stratum Number of Column 8 Contribution (3) s.e. N - number of outlets in sampling frame

 $n \quad \text{- original sample size (number of outlets in the original sample)} \\$ 

 $n1\,$  - number of sample outlets that were found to be eligible

n2 - number of eligible outlets that were inspected

x - number of inspected outlets that were found in violation

p - stratum retailer violation rate (p=x/n2)

N' - estimated number of eligible outlets in population (N'=N\*n1/n)

w - relative stratum weight (w=N'/Total Column 8)

 $pw\,$  -  $\,$  stratum contribution to the weighted RVR

s.e. - standard error of the stratum RVR

# FORM 3 (Required when a cluster design is used for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data.)

Complete Form 3 to report information about primary sampling units when a cluster design was used for the Synar survey.

**Instructions for Completing Form 3:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2016).

Provide information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

Column 1: Sequentially number each row.

Column 2: If stratification was used: Write in the name of stratum. All strata in the state must be

listed.

If no stratification was used: Write "state" in the first row to indicate that the whole state

constitutes a single stratum.

Column 3: Report the number of primary sampling units (PSUs) (i.e., first-stage clusters) created for

each stratum.

Column 4: Report the number of PSUs selected in the original sample for each stratum.

Column 5: Report the number of PSUs in the final sample for each stratum.

TOTALS: For Columns 3–5, provide totals for the state as a whole in the last row of the table.

	Summary of Clusters	:	opled State: WA FFY: 2016	
(1) Row #	(2) Stratum Name	(3) Number of PSUs Created	(4) Number of PSUs Selected	(5) Number of PSUs in the Final Sample
	Total			

## FORM 4 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar Survey data)

Complete Form 4 to provide detailed tallies of ineligible sample outlets by reasons for ineligibility and detailed tallies of eligible sample outlets with noncomplete inspections by reasons for noncompletion.

**Instructions for Completing Form 4:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2016).

Column 1(a): Enter the number of sample outlets found ineligible for inspection by reason for ineligibility. Provide the total number of ineligible outlets in the row marked "Total."

Column 2(a): Enter the number of eligible sample outlets with noncomplete inspections by reason for noncompletion. Provide the total number of eligible outlets with noncomplete inspections in the row marked "Total."

Inspection Tallies b	Inspection Tallies by Reason of Ineligibility or Noncompletion							
	State: WA							
		<b>FFY:</b> 2016						
(1) INELIGIBLE		(2) ELIGIBLE						
Reason for Ineligibility	(a) Counts	Reason for Noncompletion	(a) Counts					
Out of business		In operation but closed at time of visit						
Does not sell tobacco products		Unsafe to access						
Inaccessible by youth		Presence of police						
Private club or private residence		Youth inspector knows salesperson						
Temporary closure		Moved to new location						
Unlocatable		Drive-thru only/youth inspector has no driver's license						
Wholesale only/Carton sale only		Tobacco out of stock						
Vending machine broken		Ran out of time						
Duplicate		Other noncompletion reason(s) (Describe.)						
Other ineligibility reason(s) (Describe.)								
			ı					
			1					
Total		Total						

# FORM 5 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data)

Complete Form 5 to show the distribution of outlet inspection results by age and gender of the youth inspectors.

**Instructions for Completing Form 5:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2016).

Column 1: Enter the number of attempted buys by youth inspector age and gender.

Column 2: Enter the number of successful buys by youth inspector age and gender.

If the inspectors are age eligible but the gender of the inspector is unknown, include those inspections in the "Other" row. Calculate subtotals for males and females in rows marked "Male Subtotal" and "Female Subtotal." Sum subtotals for Male, Female, and Other and record in the bottom row marked "Total." Verify that that the total of attempted buys and successful buys equals the total for Column 4(c) and Column 5(c), respectively, on Form 1. If the totals do not match, please explain any discrepancies.

#### **APPENDIXES B & C: FORMS**

#### **Instructions**

Appendix B (Sampling Design) and Appendix C (Inspection Protocol) are to reflect the state's CSAP-approved sampling design and inspection protocol. These appendixes, therefore, should generally describe the design and protocol and, with the exception of Question #10 of Appendix B, are not to be modified with year-specific information. Please note that any changes to either appendix must receive CSAP's advance, written approval. To facilitate the state's completion of this section, simply cut and paste the previously approved sampling design (Appendix B) and inspection protocol (Appendix C).

#### APPENDIX B: SYNAR SURVEY SAMPLING METHODOLOGY

	State: WA
	<b>FFY:</b> 2016
1.	What type of sampling frame is used?
	☑ List frame (Go to Question 2.)
	☐ Area frame (Go to Question 3.)
	List-assisted area frame (Go to Question 2.)
_	

2. List all sources of the list frame. Indicate the type of source from the list below. Provide a brief description of the frame source. Explain how the lists are updated (method), including how new outlets are identified and added to the frame. In addition, explain how often the lists are updated (cycle). (After completing this question, go to Question 4.)

Use the corresponding number to indicate Type of Source in the table below.

1 – Statewide commercial business list
 2 – Local commercial business list
 4 – Statewide retail license/permit list
 5 – Statewide liquor license/permit list

3 – Statewide tobacco license/permit list 6 – Other

Name of Frame Source	Type of Source	Description	Updating Method and Cycle
Washington State Department of Licensing	3	List Tobacco retailers, cleaned of duplicates and vending machines since they are inaccesible for youth	All retailers are required to renew their tobacco license no later then June 30 <sup>th</sup> of each year.  The license list is updated on an ongoing basis throughout the year to reflect new applications for licenses that have been submitted, accepted, and approved.  DOH draws the sample from the list provided by the Department of Licensing.

3.	If an area frame is used, describe how area sampling units are defined and formed.	•
	N/A	

a.	Is any area left out in the formation of the area frame?
	☐ Yes ☐ No
	If Yes, what percentage of the state's population is not covered by the area frame?
	%

4.	Federal regulation requires that vending machines be inspected as part of the Synar survey. Are vending machines included in the Synar survey?							
	☐ Yes ⊠ No							
	If $No$ , please indicate the reason(s) they are not included in the Synar survey. Please check all that apply.							
	☐ State law bans vending machines.							
	State law bans vending machines from locations accessible to youth.							
	☐ State has a contract with the FDA and is actively enforcing the vending machine requirements of the Family Smoking Prevention and Tobacco Control Act.							
	Other (Please describe.)							
5.	Which category below best describes the sample design? (Check only one.)							
	Census (STOP HERE: Appendix B is complete.)							
	Unstratified statewide sample:							
	Simple random sample (Go to Question 9.)							
	Systematic random sample (Go to Question 6.)							
	Single-stage cluster sample (Go to Question 8.)							
	☐ Multistage cluster sample (Go to Question 8.)							
	Stratified sample:							
	Simple random sample (Go to Question 7.)							
	Systematic random sample (Go to Question 6.)							
	Single-stage cluster sample (Go to Question 7.)							
	☐ Multistage cluster sample (Go to Question 7.)							
	Other (Please describe and go to Question 9.)							
6.	<b>Describe the systematic sampling methods.</b> (After completing Question 6, go to Question 7 if stratification is used. Otherwise go to Question 9.)							
	N/A							
_								
7.	Provide the following information about stratification.							
	a. Provide a full description of the strata that are created.							
	Stratum 1 - King County							
	Stratum 2 - Non- King County; the states 38 other counties							
	b. Is clustering used within the stratified sample?							
	☐ Yes (Go to Question 8.)							
	No (Go to Question 9.)							

8.	<b>Provide</b>	the f	follow	ving	in	formation	about	clustering.
•	,							

a.	Provide a full description of how clusters are formed. (If multistage clusters a	re
	used, give definitions of clusters at each stage.)	

NI/A		
IN/A		
1 1/ 1 1		

b. Specify the sampling method (simple random, systematic, or probability proportional to size sampling) for each stage of sampling and describe how the method(s) is (are) implemented.

37/4		
N/A		

9. Provide the following information about determining the Synar Sample.

a. Was the Synar Survey Estimation System (SSES) used to calculate the sample size?

Yes	(Respond to part b.)
⊠ No	(Respond to part c and Question 10c.

b. SSES Sample Size Calculator used?

State Level	(Respond to Question	10a.)
Stratum Level	(Respond to Question	10a and 10b.)

c. Provide the formulas for determining the effective, target, and original outlet sample sizes.

The effective sample size is determined by:

$$S = (Z*Z*p*(1-p))/(D*D)$$

where D = 0.03(3%), Z = 1.96 and P = estimated noncompliance rate of previous year.

The target sample size is the effective sample size multiplied by the design affect is assumed to be 1.1.

The original sample size is the target sample size adjusted for ineligibility rate (R1) and non-completion rate (R2). Then, the original sample size = [(target sample size)/(R1R2)] + additional oversampling.

NOTE: R1 is a constant accounting for ineligibility (.70) and R2 is a constant accounting for non-completion (.90). See below for oversample rationale.

Oversample rationale: Under current protocol, we guarantee our local tobacco contractors that we will oversample as necessary to obtain a total sample that is at least 9% of the King County sampling frame strata and at least 11% of the non-King County sampling frame strata - as long as this total sample is equal to or greater than the sample size calculation that accounts for ineligibility and non-completion.

- 10. Provide the following information about sample size calculations for the current FFY Synar survey.
  - a. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the state level sample size, please provide the following information:

**Inputs for Effective Sample Size:** 

RVR: N/A Frame Size: N/A

**Input for Target Sample Size:** 

Design Effect: N/A

**Inputs for Original Sample Size:** 

Safety Margin: N/A

Accuracy (Eligibility) Rate: N/A

Completion Rate: N/A

- b. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the stratum level sample sizes, please provide the stratum level information:
- c. If the state does not use the sample size formulas embedded in the SSES Sample Size Calculator, please provide all inputs required to calculate the effective, target, and original sample sizes as indicated in Question 9.

The inputs are as follows:

D (confidence interval) = 0.03,

Z (95% confidence level) = 1.96

P (estimated Compliance from previous year) = 0.096

Design effect assumed: 1.1

Ineligibility rate: 0.70

Non-completion rate: 0.90

Frame size: 5869

ADDENDUM: In the attempt to reduce the number of ineligibles, we are working with the LCB to clean the list before we draw the sample. We have removed retailers that have been previously identified by LCB as ineligible (adults only venues, golf course, seasonal, wholesales, vape/hookah shops, tribal, duplicates, and discontinued business). We also account for ineligibles when we calculate the

original sample size with conservative eligibility rate of 70%-smaller than the 81.5%. This is noted in Appendix B.

Also, please note that the sample is generated in September and distributed to LCB and King County in mid-October to give time for planning; they are not required to complete the inspections until the end of June, at which time retailers that were previously identified as eligible can become ineligible.

### APPENDIX C: SYNAR SURVEY INSPECTION PROTOCOL

		State: WA
		<b>FFY:</b> 2016
In	spection I	nd to WebBGAS a copy of the Synar inspection form under the heading "Synar Form" and a copy of the protocol used to train inspection teams on conducting and the results of the Synar inspections under the heading "Synar Inspection Protocol."
1.	How do	es the state Synar survey protocol address the following?
	a.	Consummated buy attempts?
		⊠ Required
		Permitted under specified circumstances (Describe: )
		☐ Not permitted
	_	
	b.	Youth inspectors to carry ID?
		Required
		Permitted under specified circumstances (Describe: )
		☐ Not permitted
	c.	Adult inspectors to enter the outlet?
		Required
	afte	Permitted under specified circumstances (Describe: Adult inspectors enter the store compliance check in the case of sale.)
		☐ Not permitted
	d.	Youth inspectors to be compensated?
		Required
	an	Permitted under specified circumstances (Describe: LCB pays youth operatives hourly wage for their time spent doing compliance checks.)
		☐ Not permitted
2.	-	the agency(ies) or entity(ies) that actually conduct the random, unannounced aspections of tobacco outlets. (Check all that apply.)
		Law enforcement agency(ies)
	$\boxtimes$	State or local government agency(ies) other than law enforcement
		Private contractor(s)
		Other

List the agency name(s): Synar inspections are coordinated by the Washington State

<u>Department of Health (DOH) through contracts with 35 local health jurisdictions and other local agencies.</u> Additional tobacco compliance checks are cunducted by DOH, the local health jurisdictions and the LCB.

3.	Are Synar inspections combined with law enforcement efforts (i.e., do law enforcement representatives issue warnings or citations to retailers found in violation of the law at the time of the inspection?)?
4.	Describe the type of tobacco products that are requested during Synar inspections.
	a. What type of tobacco products are requested during the inspection?
	<ul> <li>☐ Cigarettes</li> <li>☐ Small Cigars/Cigarillos</li> <li>☐ Smokeless Tobacco</li> <li>☐ Other</li> </ul>
	b. Describe the protocol for identifying what types of products and what brands of products are requested during an inspection.
	Operatives attempt to buy cigarettes unless given alternative instructions.  DOH and LCB meet annually to determine product. Agencies agreed to have
	cigarettes for inspections.  Synar inspections are primarily used to make cigarette purchase attempts, but other
	tobacco products can be targeted by the compliance check at the discretion of the LCB adult inspector.
5.	Describe the methods used to recruit, select, and train youth inspectors and adult supervisors.
	The LCB hires Investigative Aides (IA) through paper application or on-line application (careers.wa.gov).
	Minor must submit application and complete an interview. Within the application, the minor must secure parental consent and agree to drug testing.
	Upon hire, the IA qualifies for social security, Medicare, and worker's compensation.
	Recruitment occurs through contact with local law enforcement Explorer programs, Public School networks (Prevention Coordinators, Counselors, School Resource Officers, etc.) Associations, DUI Target Zero taskforces, and Health County networks. We also receive referrals by word of mouth from current staff — e.g. IAs will refer siblings, friends, or school classmates.
	All IAs once hired must complete training prior to any fieldwork.
	The training sessions are delivered by a Liquor Enforcement Officer (LEO) in a face-to-face session (about 1 to 1 ½ hours) at the closest enforcement office.

1.What is a compliance check?  2.Why are compliance checks conducted?  3. Vocabulary  4. Investigative Aide Requirements  5. Hours of Work  6. Hours Report/Pay Days  7. Types of Establishments  8. 		∑ Yes
		(If <b>Yes</b> , please describe.)
		Youth and local health staff are instructed not to enter any establishment where the youth feels uncomfortable. LCB, health staff, or adult volunteers are in the immediate vicinity during any compliance check operation. The safety of the youth operative always takes priority over protocol or completion of the inspection.
		Each LHJ is required, per their contract with the DOH, to conduct a criminal background check on all adult volunteers or chaperones prior to conducting any inspections.
8.	inspecti	re any other legal or procedural requirements the state has regarding how ons are to be conducted (e.g., age of youth inspector, time of inspections, that must occur)?

		☐ Yes No
		(If <b>Yes</b> , please describe.)
	b.	Procedural
		(If <b>Yes</b> , please describe.)

Synar inspections are conducted according to a statewide protocol for inspections that is followed by local health jurisdictions. It specifies the age of inspectors and provides a framework from which training is conducted for youth inspectors.

## APPENDIX D: LIST SAMPLING FRAME COVERAGE STUDY

(LIST FRAME ONLY)

		State: WA FFY: 2016
1.	Calenda	ar year of the coverage study: <u>2015</u>
2.	a.	Unweighted percent coverage found: 92.6% (see attached Summary)
	b.	Weighted percent coverage found: NA%
	c.	Number of outlets found through canvassing: Total of 525 outlets identified in
	d.	survey. 68 were found to sell tobacco.  Number of outlets matched on the list frame: There are a total of 63 matches
	u.	between survey and list frame.
3.	a.	Describe how areas were defined. (e.g., census tracts, counties, etc.)
		Canvassing areas were defined as census tracts identified via the 2000 U.S. census.
		(See Synar Coverage Study Sampling Plan.)
	<b>b.</b>	Were any areas of the state excluded from sampling?
		☐ Yes ⊠ No
		If Yes, please explain.
		NA
1.	Please a	nswer the following questions about the selection of canvassing areas.
	a.	Which category below best describes the sample design? (Check only one.)
		Census (Go to Question 6.)
		Unstratified statewide sample:
		☐ Simple random sample ( <i>Respond to Part b.</i> )
		Systematic random sample (Respond to Part b.)
		☐ Single-stage cluster sample ( <i>Respond to Parts b and d.</i> )
		☐ Multistage cluster sample (Respond to Parts b and d.)
		Stratified sample:
		☐ Simple random sample ( <i>Respond to Parts b and c.</i> )
		Systematic random sample (Respond to Parts b and c.)
		Single-stage cluster sample (Respond to Parts b, c, and d.)
		☐ Multistage cluster sample ( <i>Respond to Parts b, c, and d.</i> )
		Other (Please describe and respond to Part b.)

h	Describe	the	sampling	methods
υ.	Describe	uie	Samping	memous.

The sampling plan is similar to the 2010 Washington State Synar Sampling Frame Coverage Study, in which 18 census tracts were covered, and 133 tobacco outlets were found.

The sampling unit is census tracts, and 18 census tracts were drawn from the list of Washington 2010 census tracts. The current tobacco retail list frame of Washington or compliance history was not used in the selection of sample. Sampling followed the steps below:

- -- A complete list of 2010 census tracts in Washington State was downloaded from Washington State Office of Financial Management. The list was used as the area sampling frame.
- -- Counties were sorted based on total population, from the most populous to the least populous. Cumulative population was computed.
- -- A sample interval was calculated from cumulative population (6,724,540/18=373,586), and then a starting point was randomly selected from the first interval (41,574).
- -- The starting point of 41,574 fell within King County. Counties then were identified sequentially following this starting point and sample interval based on cumulative population. This resulted in 6 census tracts in King County, 2 in Pierce County, 2 in Snohomish County, and 1 in Spokane, Clark, Thurston, Yakima, Whatcom, Cowlitz, Grays Harbor, and Stevens Counties respectively. Census tracts were randomly selected within those counties.

	c.	Provide a full description of the strata that were created.
		NA
	d.	Provide a full description of how clusters were formed.
		NA
5.	Were bo	orders of the selected areas clearly identified at the time of canvassing?
6.	Were al	l sampled areas visited by canvassing teams?
	<b>Yes</b>	(Go to Question 7.) $\square$ <b>No</b> (Respond to Parts a and b.)
	a.	Was the subset of areas randomly chosen?  ☐ Yes ☐ No
	<b>b.</b>	Describe how the subsample of visited areas was drawn. Include the number of areas sampled and the number of areas canvassed.

7.	Were field observers provided with a detailed map of the canvassing areas?						
∑ Yes							
	If No, describe the canvassing instructions given to the field observers.						
8.							
0.	Were field observers instructed to find all outlets in the assigned area?						
	If Yes, de	escribe any instructions given to the field observers to ensure the entire area was ed, then go to Question 10.					
	Field observers were provided training and written instructions which included: an overvof Synar program; review of maps and areas to be canvassed; canvassing instructions, he conduct review of outlet; script; and instructions for completing coding sheet and submit documentation of visits. (See attached training and protocol document.)						
	Field observers did <b>NOT</b> have access to LCB's master list frame of tobacco outlets.						
9.	If a full canvassing was not conducted:  a. How many predetermined outlets were to be observed in each area?						
	b. What were the starting points for each area?						
	c. Were these starting points randomly chosen?						
	Yes No						
	d.	Describe the selection of the starting points.					
	e.	Please describe the canvassing instructions given to the field observers, including predetermined routes.					
10.	Describe	e the process field observers used to determine if an outlet sold tobacco.					
	Field Observers were instructed to enter all retail outlets walk through the outlets to determine if tobacco products are on display for sale and/or ask outlet employees whether the outlet sells tobacco products. (See attached training and protocol document.)						
11.	_	rovide the state's definition of "matches" or "mismatches" to the Synar g frame? (i.e., address, business name, business license number, etc).					
	A "match" will require the tobacco retail outlet to have both the same business name a address as the LCB's master list frame.						

An outlet identified to sell tobacco products but do not have a matching business name and/or business address on LCB's master list frame will be defined as a "mismatch". All "mismatches" were verified and corrected as appropriate.

Outlets that are on LCB's master list frame but no longer sell tobacco products will be excluded from the calculation of the coverage rate. Outlets that do not have open store front retail will be excluded (i.e. LLC located in private residence).

### 12. Provide the calculation of the weighted percent coverage (if applicable).
