Table of Contents & Overview of Monthly Performance

Monday, March 07, 2011

Informational Report	Braam Settlement Agreement Reference	Description	Benchmark	Actual (Monthly*)	Page Number (Quick Links)
Caseload Size	Placement Stability, Goal 1, Outcome 3	Percentage of social workers providing services to one or more children in out of home care under CA Placement and Care Authority with caseloads at or below Council on Accreditation (COA) standards (18 child cases per worker).	90%	75%	3
Monthly Visits - Alternative Measure	<i>Alternative Measure:</i> Unsafe and Inappropriate Placements, Goal 1, Outcome 6	Percentage of children that receive a private and individual face-to-face health and safety visit from an assigned caseworker at least once during the calendar month.	95%	94%	7
CHET Screenings - Overall Completions	Mental Health, Goal 1, Outcome 2	Percentage of children in out-of-home care 30 days or longer that have a Child Health and Education Tracking (CHET) screen completed and documented within 30 days of entering care.	90%	94%	10
CHET Screenings - Physical Health Domain	Mental Health, Goal 1, Outcome 2	Percentage of children with a completed Early Periodic Screening Diagnosis and Treatment (EPSDT) exam within 30 days of entry into care.	90%	94%	13
CHET Screenings - Developmental Domain	Mental Health, Goal 1, Outcome 2	Percentage of children ages 0-60 months with a completed developmental screen within 30 days of entry into care.	90%	98%	16
CHET Screenings - Educational Domain	Mental Health, Goal 1, Outcome 2	Percentage of school-aged children for whom educational records are received within 30 days of entry into care.	90%	97%	19
CHET Screenings - Emotional/ Behavioral Domain	Mental Health, Goal 1, Outcome 2	Percentage of children ages 6-18 years with a completed Pediatric Symptom Checklist (PSC) - 17 and children age 3 months to 5 years of age with a completed ASQ-SE within 30 days of entry into care.	90%	98%	22
CHET Screenings - Connections	Mental Health, Goal 1, Outcome 2	Percentage of children with a completed Connections domain within 30 days of entry into care.	90%	97%	25
Referral to Early Support for Infant and Toddlers (ESIT) Program within 2 Workdays	Mental Health, Goal 1, Outcome 4	Percentage of children age 3 and under in out-of-home care with identification of concerns about developmental delays from their CHET Screens that are referred to the Early Support for Infant and Toddlers (ESIT) Program within 2 workdays.	90%	100%	28
Shared Planning Meeting Focused on CHET within 60 Days of Entry into Care	Mental Health, Goal 1, Outcome 3	Percentage of Shared Planning Meetings (SPM) that include a focus on CHET screening results that are held within 60 days of each child's entry into care.	90%	86%	31
Youth Transition (Exit) Staffings	Services to Adolescents, Goal 2, Outcome 3	Percentage of multi-disciplinary staffing meeting that are held at least six months prior to a youth's exit from foster care to address issues related to their transition to independence.	95%	67%	34

* Month represented varies according to measure and reflects most recent informational performance data available.

Children's Administration

Placement Stability

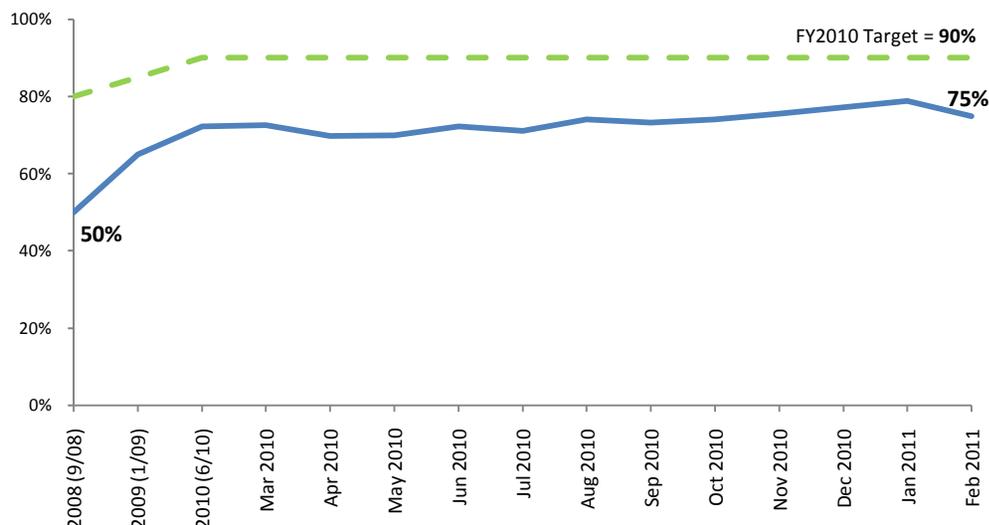

PERFORMANCE MEASURE

[TO DATA CHART](#)

Caseloads At or Below 18 Cases

Social workers will have caseloads at or below Council on Accreditation (COA) standards (18 child cases per worker). (Placement Stability, Goal 1, Outcome 3)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- February 2011 data shows about 75% of social workers, who served at least one child in out of home care, had caseloads of 18 or fewer.
- Performance shows improvement over time.
- Regional performance varies between a high of 80% in Region 3 to a low of 66% in Region 5.
- The majority of social workers are Child and Family Welfare Services (CFWS) workers. The measure also counts social workers who occasionally serve a child in out of home care (i.e. Child Protective Services, Family Reconciliation Services, and Voluntary Family Services).
- This data does not reflect the new caseload report methodology that is close to being finalized.
- Caseloads are affected by children entering and leaving out-of-home care. CA has a strong focus on reducing the length of time children and youth spend in out of home care. These efforts achieve safe legal permanency for children and help reduce social worker's caseloads.

DATA SOURCE: FamLink; supplied by Lee Doran, Lead Analyst, Children's Administration

MEASURE DEFINITION: Percentage of social workers providing services to one or more children in out of home care under CA Placement and Care Authority with caseloads at or below 18 (COA Standards).

DATA NOTES: 1 FY2008 was the first year administrative data was available to report on this outcome. 2 The data is considered estimates as changes over time in counts still represent a developing measure and utilization of the information management system used as the data source. 3 The counts are point in time as of the first day of the report month. Consistent reporting months have not been used due to timing of development and availability of measure data. 9/08 was used for FY2008 as it was the first month performance data for this outcome was available. 1/09 was used for FY2009 as it was the last month CA had confidence in the data prior to the conversion of data to FamLink. 4 FY2010 and FY2011 counts of assignments are not based on strict logic recently developed by CA due to additional time needed to refine the report methodology and strengthen accuracy of child and case assignment documentation in FamLink. 5 Compliance with this outcome requires the statewide benchmark to be met. In addition, no region's performance may be more than 10 percentage points lower than the statewide benchmark.

ACTION PLAN

- Regional managers actively monitor caseloads and make adjustments when indicated within allocated resources.
- Continue to review and correct social worker case and child assignment information in FamLink.
- Continue efforts to safely place children in permanent homes, achieve timely permanency, and make court improvements.
- Expand use of family team meetings to improve practice and better impact timely and safe permanency.
- Better engage and support relatives caring for dependent children.

Children's Administration

Unsafe/Inappropriate Placements

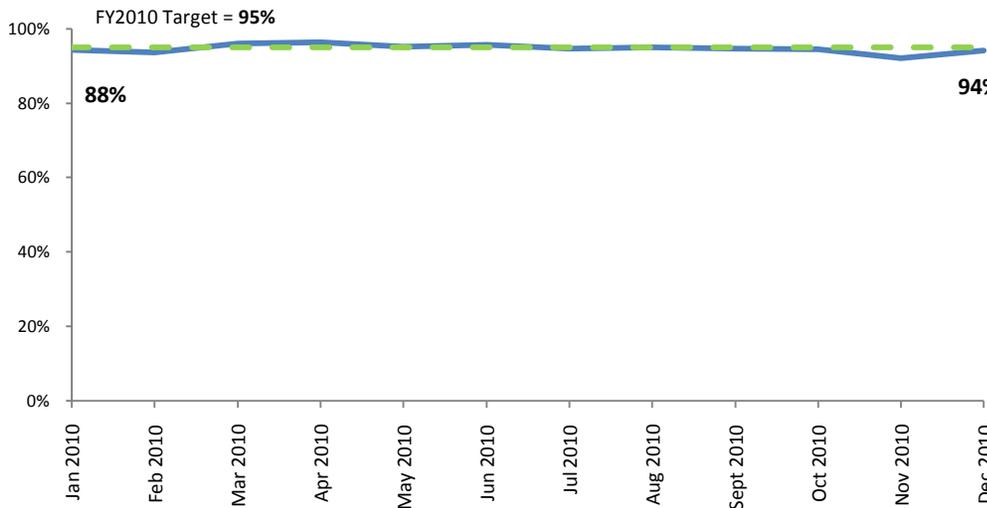

INFORMATIONAL MEASURE

[TO DATA CHART](#)

Monthly Health and Safety Visits with Children

Children will receive a private and individual face-to-face health and safety visit from an assigned caseworker at least once during the calendar month. (Alternative Measure: Unsafe and Inappropriate Placements, Goal 1, Outcome 6)

Statewide Performance (Rolling 12 Months)

SUMMARY

- 94% of children requiring health and safety visits were visited by their social worker during December 2010.
- State and regional performance in December showed improvement from November performance with the exception of Region 4 which remained the same. Regions 2, 3 5 and 6 met the 95% target. The decline in performance in November 2010 was impacted by inclement weather causing scheduled visits to be postponed, and the difficulty of scheduling around the November holidays. In addition, beginning in November 2010, direct service social workers were subject to their first temporary layoff day due to budget cuts.
- The 95% monthly target was met consistently between March and October 2010.
- Conducting quality monthly visits with children in foster care is a critical component of the child welfare system. Regular visits help engage children and parents in case planning and support their progress toward meeting identified goals.

DATA SOURCE: FamLink; supplied by Lee Doran, Lead Analyst and Chris Trujillo, Performance Evaluation Manager, Children's Administration

MEASURE DEFINITION: Percentage of children in out-of-home placement or an in-home dependency that received an individual face-to-face health and safety visit from their social worker during a single calendar month.

DATA NOTES: **1** Measures the percent of children who were seen by the assigned social worker for a Health and Safety visit during the month for children placed in out-of-home care for the full month (in placement on the 1st day of the month and no discharge during the month). **2** Population includes children in out of home placement under the age of 18 and under CA placement and care authority. **3** In December 2010, a decision was made for performance to include "Visits Conducted by Other Agencies" as compliant as reports to the Governor's office include. A random review indicates the majority are Interstate Compact for Placement of Children (ICPC) cases and visits by CA social workers inaccurately coded. Statewide counts have been updated for all previous report months. Regional performance reflects the change beginning with September-2010 performance data and not for prior months. (See complete Data Notes on page 9)

ACTION PLAN

- Communicate performance monthly and follow up with regions, offices, supervisors, and social workers when visits do not occur.
- Identify and address reasons for visits not occurring.

PERFORMANCE MEASURE

[TO DATA CHART](#)

Child Health & Education Tracking (CHET) Screens - Overall Completion

Children in out-of-home care 30 days or longer will have a completed and documented Child Health and Education Tracking (CHET) Screen within 30 days of entering care. (Mental Health, Goal 1, Outcome 2)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA performance completing required CHET Screens within 30 days of a child entering out of home care was 94% in November 2010 and exceeded the statewide benchmark of 90%.
- Recognition to Regions 1, 2, 3, and 4 for meeting the 90% target in November.
- CA performance is continuing to show a trend of improvement and is particularly visible in reviewing annual trends.
- The average number of days to complete CHET Screens in November 2010 was 27 days.
- The number of children requiring a CHET screen decreased by about 100 children between October and November and with the exception of July 2010 is the lowest number of children that required a screen since February 2010.
- High workload ratios and incomplete Physical Health domains were the two most significant reasons CHET Screens were not completed within 30 days.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons CHET Screens are not completed within 30 days to identify and address challenges.
- Work with healthcare providers that regularly do not provide timely Early and Periodic Screening, Diagnosis and Treatment (EPSDT) exam results, and triage and target follow-up.
- Continue to partner with the Fostering Well-Being Program to strengthen staff and caregivers understanding of the value of EPSDT exams and assist with locating healthcare providers.
- Actively monitor CHET Screening Specialist assignments to balance workload ratios as much as possible.

DATA SOURCE: Statewide CHET Database; supplied by Brenda Villarreal, Statewide CHET Program Manager

MEASURE DEFINITION: Children in out-of-home care 30 days or longer will have completed and documented Child Health and Education Track (CHET) screens within 30 days of entering care.

DATA NOTES: **1** The benchmark for this outcome was established beginning with FY2007. FY2007 rates also reflects a change in the definition for considering a CHET Screen complete. **2** Performance is based on children newly entering out of home care that meet criteria for a CHET Screen to be completed. **3** In order for a CHET Screen to be counted as complete, the Screening Report must have all of the age appropriate screening domains completed within 30 days of entry into care. **4** FY2009 performance only includes months Feb 1 – June 30, 2009 data due to the FamLink transition period. This period also marks the start of using a revised definition for “completion.” (See complete Data Notes on page 12)

PERFORMANCE MEASURE

[TO DATA CHART](#)

CHET Screens - Physical Health Domain

Percentage of children with a completed Early and Periodic Screening, Diagnosis and Treatment (EPSDT) exam within 30 days of entry into care. (Mental Health, Goal 1, Outcome 2)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA achieved the 90% benchmark statewide August - November 2010 for completing the Physical Health Domain within 30 days of a child entering out of home care. November performance was 94%

- Recognition to Regions 1, 2, 3 and 4 who achieved 98-100% performance for the month of November 2010.

- An examination of the data to identify the most significant reasons the Physical Health domain is not completed within 30 days continues to show it is healthcare providers being unable to provide an Early and Periodic Screening, Diagnosis and Treatment (EPSDT) exam date within 30 days and delays in receiving EPSDT exam results.

- In November 2010, a list of health care providers that regularly do not provide timely EPSDT results was provided to Regional CHET Coordinators to triage and target follow-up with the providers.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons Physical Health Domains are not completed within 30 days to identify and address challenges.

- Follow up with healthcare providers that regularly do not provide timely results.

- Continue to partner with the DSHS Fostering Well-Being Program to strengthen staff and caregiver understanding of the value of EPSDT exams.

DATA SOURCE: Statewide CHET Database; supplied by Brenda Villarreal, Statewide CHET Manager

MEASURE DEFINITION: Percentage of children with completed EPSDT exams within 30 days of entry into care.

DATA NOTES: **1** See complete Data Notes for Overall CHET Screen Completion on page 12. **2** To achieve compliance with the Physical Health CHET Screen domain, the child must receive an Early Periodic Screening Diagnostic and Treatment (EPSDT) exam and the exam results must be obtained verbally or in writing and documented within 30 days of the child entering out-of-home care. **3** FY2008 performance was calculated using EPSDT Medicaid billing and encounter records. Beginning in 2009, the data source to calculate performance is the Statewide CHET database and FamLink. **4** *FY2009 performance only includes months Feb 1 – June 30, 2009 data due to the FamLink transition period. This period also marks the start of using a revised definition for “completion.”

CHET Screens - Developmental Domain

Percentage of children ages 0-60 months with a completed developmental screen within 30 days of entry into care. (Mental Health, Goal 1, Outcome 2)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA has consistently exceeded the 90% benchmark for children having their CHET Screen Developmental Domain completed within 30 days. Performance in November 2010 was 98%.
- The 90% target was achieved in 11 of the last 12 months.
- Every region met the benchmark between September - November 2010.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons Developmental Domains are not completed within 30 days to identify and address challenges.

DATA SOURCE: Statewide CHET Database; supplied by Brenda Villarreal, Statewide CHET Program Manager

MEASURE DEFINITION: Percentage of children ages 0-60 months with completed developmental screens within 30 days of entry into care.

DATA NOTES: 1 See complete Data Notes for Overall CHET Screen Completion on page 12. 2 To achieve compliance with the Developmental CHET Screen domain, children from birth to 60 months of age must have an age appropriate screening tool (Denver or ASQ) completed within 30 days of the child entering out of home care. 3 *FY2009 performance only includes months Feb 1 – June 30, 2009 data due to the FamLink transition period. This period also marks the start of using a revised definition for “completion.”

CHET Screens - Education Domain

Percentage of school-aged children for whom educational records are received within 30 days of entry into care. (Mental Health, Goal 1, Outcome 2)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA performance for children having their CHET Screen Education Domain completed within 30 days of entering out of home care was 97% in November 2010. The 90% benchmark was met consistently statewide between August - November 2010.

- Statewide performance shows significant improvement from summer months when schools were closed.

- Recognition to Regions 2, 3, 4 and 6 who achieved 100% performance in November 2010 and to Region 1 for exceeding the benchmark.

- Data showing the primary reason the Education Domain is not completed within 30 days is CA not receiving education records within 30 days.

- In November 2010, a list of schools that regularly do not provide timely educational records was provided to Regional CHET Coordinators to triage and target follow-up.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons Education Domains are not completed within 30 days to identify and address challenges.

- Continue to build relationships and follow up with local and district school staff to increase timely receipt of school records.

- Identify schools and school districts that regularly do not provide timely results, and triage and target follow-up.

CHET Screens - Connections Domain

Percentage of children with a completed Connections domain within 30 days of entry into care. (Mental Health, Goal 1, Outcome 2)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA has consistently exceeded the 90% benchmark statewide since June 2010 for children having their CHET Screen Connections Domain completed within 30 days of entering out of home care.
- All regions met the monthly target between September - November 2010.
- Recognition to Regions 3, 4, and 6 for exceeding the benchmark the past 12 months.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons Connections Domains are not completed within 30 days to identify and address challenges.

DATA SOURCE: Statewide CHET Database; supplied by Brenda Villarreal, Statewide CHET Program Manager

MEASURE DEFINITION: Percentage of children with completed Connections within 30 days of entry into care.

DATA NOTES: 1 See complete Data Notes for Overall CHET Screen Completion on page 12. 2 To achieve compliance with the Connections CHET Screen domain, all children must have their "connections" assessed within 30 days of entering out of home care. 3 *FY2009 performance only includes months Feb 1 – June 30, 2009 data due to the FamLink transition period. This period also marks the start of using a revised definition for "completion." FY2009 was also the first year information regarding assessment of the Connections domain was documented in the Statewide CHET database.

Early Support for Infant and Toddlers (ESIT) Program Referral within 2 Workdays

Children age 3 and under in out-of-home care will be referred to the Early Support for Infant and Toddlers (ESIT) Program within 2 workdays of identification of concerns about developmental delays from their CHET screen. (Mental Health, Goal 1, Outcome 4)

Statewide Performance (Prior Years and Rolling 12 Months)

SUMMARY

- CA performance continues to exceed the 90% benchmark statewide for referring children with identified concerns of developmental delays to the Early Support for Infant and Toddlers (ESIT) Program within 2 workdays.
- Performance shows a steady trend of improvement over time.
- CA has met the 90% benchmark since April 2010 and the requirement for regional performance to be no more than 10 percentage points lower than the benchmark since June 2010.
- Recognition to Region 6 for achieving 100% performance every month for the past 12 months and to all regions for achieving 100% performance for the months of October and November 2010.

ACTION PLAN

- Continue to conduct ongoing monthly review of reasons ESIT Program referrals are not made within 2 workdays to identify and address any identified challenges.

DATA SOURCE: Statewide CHET Database; supplied by Brenda Villarreal, Statewide CHET Program Manager

MEASURE DEFINITION: Children age 3 and under in out-of-home care will be referred to the Early Support for Infant and Toddlers Program within 2 workdays of identification of concerns about developmental delays from their CHET screens.

DATA NOTES: **1** *FY2009 was the first year administrative data was available to report on this outcome and covers Feb 1 – June 30, 2009 data due to the FamLink transition period. This period also marks the start of using a revised definition for CHET Screen “completion” criteria. **2** Population is based on children newly entering out of home care, in care 30 days or more, and under CA Placement and Care Authority that meet criteria for a CHET Screen to be completed, including completion of a developmental screening. Shared Planning Meeting Focused on CHET Screen within 60 Days

A shared planning meeting focused on the CHET screening results will be held within 60 days of each child's entry into care. (Mental Health. Goal 1. Outcome 3)

Statewide Performance (FY2010 and Rolling 12 Months)

DATA SOURCE: FamLink and Statewide CHET Database; supplied by Lisa Barber, Data Analyst, Children's Administration

MEASURE DEFINITION: A shared planning meeting (SPM) focusing on the CHET screening results will be held within 60 days of each child's entry into care.

DATA NOTES: 1 FY2010 is the first year administrative data was available to report on this outcome. 2 Population includes children newly entering out of home care during the fiscal year, in out-of-home care for 60 days or more, and under CA Placement and Care Authority who meet the criteria for a required CHET Screen. 3 To achieve compliance a shared planning meeting focused on CHET Screen results must be held within 60 days of the child entering out of home care and accurately documented in FamLink. (See complete Data Notes on page 33)

SUMMARY

- Performance for social workers holding a Shared Planning meeting focused on children's CHET Screen results within 60 days of entry into care was 86% in November 2010.
- CA performance has steadily improved during the last year.
- Recognition to Region 3 for exceeding the 90% target the last four reporting months and to Regions 3 and 4 for achieving 100% performance in November 2010.
- Timely and thorough planning helps ensure the needs of children in out of home care are met. Reviewing and discussing CHET Screen results helps social workers, parents, caregivers, and age appropriate children/youth develop effective case plans.
- During Spring 2010 a monthly FamLink management report was developed, communication was sent to staff and managers to strengthen responsibilities and remind them of practice expectation, and regions improved accuracy of information documented in FamLink.
- In October 2010, staff received in-service training on policy updated to better reflect required timeframes for staffings.
- In November 2010, FamLink design changes were made to improve the Shared Planning Meeting page and strengthen fields used for administrative reporting.

ACTION PLAN

- Continue to use the FamLink Management report to monitor and analyze performance and identify and address improvement needs.
- As needed, provide staff in-service refresher training on the policy and practice expectations and how to document shared planning meeting information in FamLink.

Youth Transition (Exit) Staffings

A multi-disciplinary staffing meeting will be held six months prior to a youth's exit from foster care to address issues related to transition to independence. (Services to Adolescents, Goal 2, Outcome 3)

Statewide Performance (FY2010 and Rolling 12 Months)

SUMMARY

- Performance for holding a multi-disciplinary transition staffing at least six months prior to a youth's exit from foster care to address youth's transition to independence was 67% in December 2010.
 - September - November 2010 performance was updated to reflect the most available data.
 - Region 4 was the highest performer in December 2010 at 100%.
 - Performance shows marked improvement over the past year.
 - The number of youth turning 17.5 years of age in a month is relatively small and can cause fluctuation in percentages and trend lines, particularly for regions.
 - A monthly FamLink management report was published in August 2010 to help monitor performance and target improvement activities.
 - In September 2010, social workers began receiving email reminders when youth turn 17 years old to schedule a staffing.
 - In October 2010, the policy and staffing form were updated to meet federal requirements and staff was provided in-service training.
 - In November 2010, FamLink design changes were made to improve the Shared Planning Meeting page and strengthen fields used for administrative reporting.
 - In November 2010, a quality assurance system was implemented with monthly reporting requirements to help ensure youth receive a Transition Staffing and Transition Plan prior to turning 17.5 years.
- #### ACTION PLAN
- Ongoing use of the FamLink Management report to monitor and analyze performance and address improvement needs.
 - Strengthen quality assurance tracking and reporting system to ensure youth receive a Transition Staffing, the staffing is timely and accurately documented in FamLink, and reasons for non-compliance are identified.
 - Develop and implement an on-line FamLink Management report to provide staff and managers more ready access to performance data for this outcome.

DATA SOURCE: FamLink; supplied by Lee Doran, Lead Analyst, Children's Administration

MEASURE DEFINITION: A multi-disciplinary staffing meeting will be held six months prior to a youth's exit from foster care to address issues related to transition to independence.

DATA NOTES: 1 FY2010 is the first year administrative data was available to report on this outcome. 2 Population includes all youth in out-of-home care under CA Placement and Care Authority who were in care for at least 30 days and turned 17.5 years during the specified calendar month. 3 To achieve compliance the multi-disciplinary staffing meeting must have been held between the age of 17 years to 17.5 years or within 30 days of turning 17.5 years and be documented accurately in FamLink. 4 September - November 2010 data was updated with the February 2010 monthly report to reflect the most current performance data available and to correct an error in the September counts. 5 In December 2010 the report methodology was changed to address duplication of some of the youth when multiple staffings occur. (See complete Data Notes on page 36)

Data notes	<p>1 FY2010 is the first year administrative data was available to report on this outcome.</p> <p>2 Population includes all youth in out-of-home care under CA Placement and Care Authority who were in care for at least 30 days and turned 17.5 years during the specified calendar month.</p> <p>3 To achieve compliance the multi-disciplinary staffing meeting must have been held between the age of 17 years to 17.5 years or within 30 days of turning 17.5 years and be documented accurately in FamLink.</p> <p>4 September - November 2010 data was updated with the February 2010 monthly report to reflect the most current performance data available and to correct an error in the September counts.</p> <p>5 In December 2010 the report methodology was changed to address duplication of some of the youth when multiple staffings occur.</p> <p>6 In November 2010 the methodology for this report was revised to count as compliant staffings between the age of 17 years and 17.5 years and exclude staffings that occur prior to 17 years (per Children's Administration policy) and identify staffings that occur within 90 days of turning 18 years (Federal standard).</p> <p>7 The report continues to be refined as results are validated by program leads and staff in regions.</p> <p>8 The number of children in care more than 30 days that turn 17.5 years each month, statewide and particularly by region, is a limited number and should be interpreted with caution.</p> <p>9 Compliance with this outcome requires the statewide benchmark to be met. In addition, no region's performance may be more than 10 percentage points lower than the statewide benchmark.</p>

DATA

DATE	Statewide Rate	TARGET	Compliant Staffings	Staffing Held Before 17 or Between 17.6 - 17.8 Years	Staffing Held within 90 Days of 18 Years	No Staffing Documented	Total Non-Compliance	Total Youth 17.5 Years	Region 1	Region 2	Region 3	Region 4	Region 5	Region 6
