

## Reinforcement Assessment for Individuals with Severe Disabilities (RAISD)

Individual's Name: \_\_\_\_\_

Date: \_\_\_\_\_

Recorder: \_\_\_\_\_

*The purpose of this structured interview is to get as much specific information as possible from the informants (e.g., teacher, parent, caregiver) as to what they believe would be useful reinforcers for the student. Therefore, this survey asks about categories of stimuli (e.g., visual, auditory, etc.). After the informant has generated a list of preferred stimuli, ask additional probe questions to get more specific information on the student's preferences and the stimulus conditions under which the object or activity is most preferred (e.g., What specific TV shows are his favorite? What does she do when she plays with a mirror? Does she prefer to do this alone or with another person?)*

We would like to get some information on \_\_\_\_\_'s preferences for different items and activities.

1. Some individuals really enjoy looking at things such as a mirror, bright lights, shiny objects, spinning objects, TV, etc. What are the things you think \_\_\_\_\_ most likes to watch?

After completion of the survey, select all the stimuli which could be presented or withdrawn contingent on target behaviors during a session or daily activity (e.g., a toy could be presented or withdrawn, a walk in the park could not). Write down all of the specific information about each selected stimulus on a 3" x 5" index card (e.g., likes a female adult to read him the 'Three Little Pigs' story.) Then have the informant(s) select the 16 stimuli and rank order them using the cards. Finally, list the ranked stimuli below.
