In-Person FA/PBSP Plan Writing Training

Supporting individuals with Neurodevelopmental Disorders and/or mental health issues can require unique and individualized supports. This two-day information session will focus on how functional assessments (FA) and positive behavior support plans (PBSP's) can help individuals live successfully in the community. Training topics include:

- The regulatory framework guiding FA/PBSP's
- Person-centered planning
- Gathering history and conducting a functional assessment
- Turning the functional assessment into a plan
- Replacement behaviors
- Data collection and analysis
- And much more!

Participants will be introduced to DDA's recently revised preferred structure of a functional assessment and positive behavior support plan and will leave with a foundation in how to write person-centered, able-to-be implemented plans and methods to measure their effectiveness.

****We strongly encourage participants to review the DDA FA/PBSP online modules in***

A little about your presenter:

Gaye Sherman

Gaye has worked with DDA for over ten years and in the mental health field for over twenty years. She has a strong background in providing services in the school system for Exceptional Student Education and Social Skills Groups, RHC settings and Mental Health Hospitals. Gaye has extensive experience providing support to individuals who are dually diagnosed as well as individuals who have neurodevelopmental diversity disorders. Professional training includes – Clinical & Counseling Psychology, behavioral analysis and minority mental health training for African Americans.

Gaye is a member the Region 2 Clinical Team, and a member of our Regional ETP Committee, along with Jason St. Claire and Emily Benbow, Region 2 Psychology Associates and her regional counterparts.

Class Size: Limited to 15 Participants
