TITLE: REFERRAL AND PLACEMENT INTO COMMUNITY RESIDENTIAL SERVICES

PURPOSE

This policy provides the opportunity for persons who are eligible for services from the Division of Developmental Disabilities (DDD) to live in a manner that meets their needs and preferences, and ensures that the service provider is aware of the individual's needs prior to admission.

SCOPE

This policy applies to the referral and placement of persons into DDD funded community residential services, State Operated Living Alternatives (SOLA), Adult Family Homes (AFH), and Adult Residential Care (ARC) facilities. Family Support, individual provider services, and in-home attendant and/or personal care services are outside the scope of this policy.

POLICY

A. When referring or placing a person into residential services, DDD will ensure that:

1. The individual and the service provider are provided the necessary information and opportunities to make an informed decision; and

2. The program has the necessary licensure, contract, or certification, and is within its contracted capacity.
B. DDD will make referral for a vacancy within 30 days based on the vacancy profile information received from the service provider. The service provider may use the Residential Services Vacancy Profile sample form included in Attachment A of this policy.

**PROCEDURES**

A. When referring people to residential service providers, the DDD case resource manager (CRM) must obtain a "Release of Information" form signed by the individual and/or the legal guardian within the last ninety (90) days. The CRM must also consider the:

1. Personal preference of the individual being referred;
2. Personal preference of potential roommate(s);
3. Ability of the service provider to meet the person’s health, safety, and program needs; and
4. Needs of all persons in the residence, including safety and protection needs.

B. Referral packets must include all required forms and known information. This includes:

1. A Provider Placement Letter (DSHS Form 10-232) listing the information included in the packet. A copy of the signed form is returned by the service provider to DDD for the person's file. The CRM must place the form signed by the service provider in the person’s file.

2. Financial information, such as:
   a. Verification of SSI/SSA status;
   b. Eligibility for financial assistance, (e.g., food stamps, Medicaid);
   c. Earned and unearned income and resources; and
   d. Payee information.

3. Legal information, such as:
   a. Guardianship information and documentation;
   b. Marital status, children, family members, and names and addresses of all significant people in the person's life; and
d. Copies of court orders or legal action involving the person; and

e. Names of perpetrator or victims of crime (if known). The person’s expressed consent must be obtained before sharing this information.

4. The current assessment and service plan identified as the Individual Service Plan (ISP) per DDD Policy 3.01, Service Plans;

5. Health information, such as:

   a. Medical history, immunization records, and medications.

   Per RCW 70.24.105 and WAC 246-100-016, an individual's Hepatitis B Virus (HBV) and HIV status are confidential and cannot be shared.

   b. Dates, sources, and copies of the most recent available psychological and/or mental health evaluations, including any behavioral and psychiatric information and plans.

6. Nurse delegation assessments when applicable. These must be provided no later than the day of placement to the program. The contracted registered nurse (RN) must use the approved Delegation of Nursing Care Tasks form (DSHS 10-217);

7. Educational and vocational records; and

8. Current information regarding other program services and agencies serving the person.

C. The residential service provider must evaluate the person's referral for service to determine whether the service provider has the resources to meet the person's needs. Within ten (10) working days of receipt of the referral packet, the service provider must notify the CRM whether or not they accept the referral for further evaluation. If a decision is not possible within ten (10) days, the service provider will consult with the CRM to mutually agree on an extended timeframe.

1. Following acceptance for further evaluation, the service provider will arrange a pre-placement visit during which the residential service provider must describe to the person the services that will be provided in that program and provide access to the program’s written policies upon request.

2. If the service provider decides not to accept the referral, the service provider must put their decision and reason for not accepting the person in writing and return the
referral information to the CRM.

3. The service provider must adhere to all relevant statutes and WACs regarding confidentiality.

4. If the service provider accepts the person's referral, the service provider, the person and the CRM must agree on a timely process to complete the placement.

5. DDD will provide an authorization for service the working day immediately following the date of placement. For supported living providers, DDD will provide authorization for services on the date of placement.

D. **Short term placements** must meet the standard placement criteria for sharing essential information and ensuring the safety of the person, service provider, and other residents, as described in Sections A, B, and C above.

E. **Emergency placements** are those situations where the immediate placement needs of the person do not allow for the standard referral process described in Sections B and D of this policy. In these situations, the CRM must:

1. Use the Comprehensive Assessment (CA) when one is required by program rules, and obtain the service provider's signature on the service plan; or

2. Complete the *Emergency Placement Referral* form (DSHS 10-233) and:
   a. Attach any client information immediately available; and
   b. Include the *Provider Placement Letter* to document the information given and received.

3. Document conversations with the service provider in the client episode record; and

4. Provide complete written information within five (5) working days of the placement (i.e., social, medical, and criminal history, and an updated service plan).

F. **Individuals with challenging support issues** have a history of offenses and/or behaviors that may be of concern. Such persons must be identified on the *Individual with Challenging Support Issues* form (DSHS 10-234) and are subject to the following additional procedures when being referred for placement. The CRM will:

1. Provide a copy of the *Individual with Challenging Support Issues* form to the residential service provider;
2. Describe in writing the level of supervision and support needed by the person;

3. Identify in writing any significant risks to others posed by the person, and what supports are necessary to manage these risks. This must include the person's issues regarding access to vulnerable people (e.g., housemates, children, neighbors, schools, childcare centers, etc.);

4. Provide the names and phone numbers of people to call if the person's behavior becomes dangerous beyond the service provider’s ability to ensure the safety of the person or others;

5. Obtain the service provider's signature on the service plan and/or contract. The service provider signature is confirmation the service provider agrees that the supervision and supports outlined in the service plan can be provided within the DSHS/DDD reimbursement rate; and

6. Implement the procedures outlined in Section E of this policy for crisis and emergency placements.

Note: For persons with community protection issues, the CRM must complete Individual with Community Protection Issues (DSHS Form 10-258) and give a copy of the form and the psychosexual/risk assessment to the service provider.

G. Crisis/Respite Mental Health Diversion services provided by DDD certified residential service providers are available as deemed appropriate by DDD. These services are available to persons who are being diverted from psychiatric hospitalization through the provision of this service. The following items are specific to the placement of these individuals:

1. DDD Field Services offices contracting with residential service providers for crisis/respite mental health diversion services must have in place written procedures and interagency agreements between DDD, the Regional Support Network (RSN), and, if appropriate, the Aging and Adult Services Administration (AASA).

2. The interagency agreements must address the following:

   a. Release of information by local mental health authorities;

   b. Clear procedures on whom to contact when a person's behavior becomes dangerous beyond the service provider’s capacity to ensure the safety of the person or others; and
c. A schedule for regular meetings between DDD, the RSN, and the contractor to revise and update common understandings and procedures regarding:

1. Placement of persons into crisis and diversionary care;
2. Mental health supports needed while in crisis care; and
3. Plans to return home or to an alternative placement.
