

Basic Food

SFY

2016

The Basic Food Program is Washington's name for the combination of the federally-funded Supplemental Nutrition Assistance Program (SNAP) and the state-funded Food Assistance Program for Legal Immigrants (FAP). FAP is for individuals who are legal immigrants and meet all the eligibility requirements for SNAP except citizenship or alien status.

Basic Food Overview

This chapter summarizes the caseload and client data for the Basic Food program in SFY 2016. The following programs will be highlighted in this chapter.

- **Supplemental Nutrition Assistance Program (SNAP)**, formerly known as Food Stamps, provides food assistance to eligible low-income individuals and families.
- **Food Assistance Program for Legal Immigrants (FAP)** provides food assistance for legal immigrants who are not eligible for the federal Supplemental Nutrition Assistance Program (SNAP).
- **Basic Food Employment and Training (BFET)** provides job search assistance, employment, education and skills training, and support services to individuals receiving SNAP, who are not participating in the state's Temporary Assistance for Needy Families (TANF) program.
- **Washington Combined Application Program (WASHCAP)** is a simplified food benefits program for certain Supplemental Security Income (SSI) recipients that delivers food benefits through an automated interface between the Social Security Administration (SSA) and DSHS. A client's application for SSI also acts as the application for food benefits. Clients who receive WASHCAP are certified for up to 36 months.
- **Transitional Food Assistance (TFA)** is a food assistance program that provides food benefits to families leaving Temporary Assistance for Needy Families (TANF) or Tribal TANF cash assistance programs.
- **Resources to Initiate Successful Employment (RISE)** enhances the current BFET program by adding case management, work-based learning, and strategies for success to assist clients in becoming self-sufficient.

Basic Food program caseloads can be broken into three types:

- Cases Receiving SSI – recipients who also received Supplemental Security Income (SSI).
- Cases Receiving Cash Assistance – recipients who also received a cash assistance grant.
- Cases Not Receiving Cash Assistance or SSI – recipients who only received food assistance.

Highlights

The average monthly Basic Food program caseload in Washington State **decreased by 3.6% in SFY 2016 (561,095) from SFY 2015 (582,192)**. Of the SFY 2016 caseload, a majority (75.4%) did not receive cash assistance or SSI. The percentage of cases in SFY 2016 that received cash assistance averaged 8.3% and the percentage of cases that received SSI was 16.3%.

The average monthly number of clients served by the Basic Food Employment and Training (BFET) program in SFY 2016 was 7,605.

TECHNICAL NOTES

DATA SOURCES: The majority of the data covered in this chapter was based on the ESA's Automated Client Eligibility System (ACES) in September 2016. The Basic Food Error Rate was provided by ESA's Division of Program Integrity. BFET data was based on both ACES and the Electronic Jobs Automated System (eJAS).

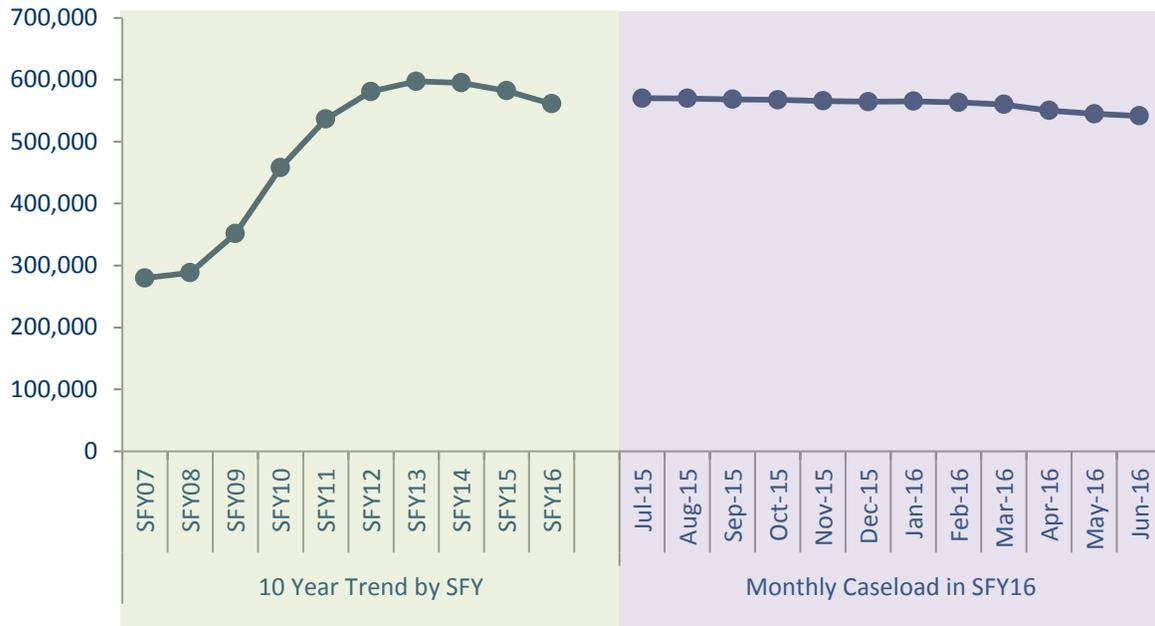

DATA NOTES: 1) Unless otherwise noted, both the federally funded SNAP program and the state-funded Food Assistance Program for Legal Immigrants (FAP) are reported jointly in this chapter. 2) Percentages may not add up to expected totals due to rounding.

⁶ SNAP is the federal food assistance program. FAP is the state-funded Food Assistance Program for Legal Immigrants. Some households have a member receiving federal food assistance and a member receiving state-funded FAP.

⁷ FAP caseload includes mixed SNAP and FAP cases as well as FAP-only cases.

⁸ FAP benefits are established in the biennial Operating Budget and can be changed in the Supplemental Budget.

⁹ These are federal expenditures on mixed SNAP/FAP households in which at least one individual is a recipient of the federal SNAP benefits and at least one individual is a recipient of the state's FAP benefits.

Caseload by DSHS Region and CSO of Issuance and Residence, June 2016 Snapshot

The following pages detail the Basic Food caseload, June 2016 snapshot, by both the CSO of Issuance and CSO of Residence.

- CSO of Issuance: Based on the location from which benefits were issued. While most benefits are issued through ESA's Community Service Offices (CSO), benefits may be issued by Customer Service Contact Centers (CSCC) Port Gamble S'Klallam Tribe (PGST), or Home and Community Services Offices (HCS) within DSHS's Aging and Long-Term Support Administration.
- CSO of Residence: Based on where the clients live within a CSO coverage area.

Overview	CSO of Issuance				CSO of Residence			
	# of Cases	% of State Total	# of Clients	% of State Total	# of Cases	% of State Total	# of Clients	% of State Total
Region 1 CSOs	126,335	23.3%	265,830	27.3%	149,871	27.7%	290,516	29.8%
Region 2 CSOs	154,116	28.4%	291,377	29.9%	191,542	35.4%	330,747	34.0%

2014	0.4	0.8	0.1	3.8	3.7
2015 ¹⁴	0.2				

Information about the Basic Food Program Error Rate

Each month a number of Basic Food cases are randomly selected for federal quality control review. The findings on all cases are reported monthly to the Food and Nutrition Service (FNS), a part of the U.S. Department of Agriculture which administers the Supplemental Nutrition Assistance Program (SNAP). After 12 months of reviews are reported, the data collected is considered statistically valid. These findings, along with a regression-adjusted rate (based on federal differences and the number of completions) determined by FNS, comprise the state's official error rate. The error rates of all states are used to determine the national average payment error rate.

The state's payment error rate is compared to the national average payment error rate to determine if the state is in sanction status or is eligible for bonus monies. States may be awarded bonus monies as either one of the best in the nation or one of the most improved. However, a state will be in sanction status if it exceeds the federal error tolerance level for at least two consecutive years.

Determining sanctions is a two-step process. First, the lower boundary of the state's error rate at 95% confidence interval is determined and compared to 105% of the national payment error rate. (Example: An error rate of 8.5% may have a tolerance level of +/- 0.5%. This means that there is a 95% chance that the error rate

¹⁰ Official data is made available nine months after the end of the previous Federal Fiscal Year. Therefore, 2016 data is not yet available.

¹¹ Calculation of the lower bound began in FFY 2003 when the new bonus and penalty system went into effect as it is used in the determination of potential sanction.

¹² The tolerance level is a federally determined threshold that states may be sanctioned for exceeding. Prior to 2003, the tolerance level was set at the national average. Beginning in 2003, the tolerance level became 105 percent of the national average.

¹³ The difference is calculated by subtracting the lower boundary of the Official State Error Rate from the federally determined tolerance level. If a number is positive, it means that the lower boundary is below the tolerance level and is not subject to sanction status. If the number is negative, it means that the lower boundary is above the tolerance level and the state is subject to sanction status.

¹⁴ At the time this report was produced, Federal data (official state error rate, lower bound, tolerance, and difference) was unavailable for FFY 2015.

falls between 8% and 9%. The lower boundary of 8% is compared to 105% of the federal rate. If the federal error rate is 7.75%, the rate used would be 7.75×1.05 , or 8.2%. In this example, the state's lower boundary error rate of 8% is less than 105% of the federal error rate, or 8.2%, so there is no sanction. If the state's lower boundary is above the adjusted federal rate, then the second step, determining the sanction amount, is computed. To compute this, determine the difference between the state's error rate and 6%. (This figure of 6% is constant.) Multiply that difference by the value of all allotments issued during the federal fiscal year and then multiply it by 10%. That is the amount of the potential sanction for one year.

The USDA Secretary determines if all or most of a sanction amount will be waived. If not waived, the Secretary can determine how much of that amount will be used for reinvesting in payment accuracy activities and how much will be "at risk," or eligible to be repaid to FNS if the state is in sanction for a second consecutive year.
