REMOVE	**INSERT**
Removed language in Worker Responsibilities stating that the RSN authorization number is used to confirm RSN approval on psychiatric indigent inpatient (PII) applications.	Added language in Clarifying Information and Worker Responsibilities stating that the Provider One authorization number along with an authorization status of <u>approved </u>confirms RSN approval on psychiatric indigent inpatient (PII) applications.
Removed Appendix A – An example of an RSN authorization form.	Added language in Worker Responsibilities stating that the hospital will enter the Provider One authorization number on the PII application to confirm RSN approval.

Summary

This revision is done to bring A-Z Manual in compliance with policy changes that are in effect 05–09-2010.

RSN forms and authorization numbers are no longer provided with PII applications since the RSN number is not used in Provider One. Instead, the Provider One authorization number with an authorization status of <u>approved </u>confirms RSN approval. The Provider One authorization number will be entered on the PII application indicating RSN approval. The Provider One authorization number will be entered in the RSN Number field on the ALAS screen in ACES on cases with an authorization status of <u>approved</u>.
