Additional Mental Health Questions (Asked of Caregiver)

Evidence Based Practice (EBP) suggests there are concerns for children taking two or more psychotropic medications, children under the age of six taking any psychotropic medications, and children taking any number of psychotropic medications without the presence of EBP Services. Children in these categories need a mental health evaluation and/or referral to EBP Services to determine appropriateness of medications. (Children taking medications for ADD / ADHD that have improved behavior / functioning as a result of taking the medications may not need EBP Services.)

1. Is the child currently receiving mental health services? .......................
   If yes, do these services seem to be helping the child? ..................

2. Is the child currently taking any psychotropic medication(s)?...............

3. Is the child taking two or more psychotropic medications?.................
   If yes, taking medications, do they seem to be helping the child?...

4. Is the child under six years of age?...........................................

If a box below is checked, Mental Health referral is recommended.

Based on the answers to these questions this child needs further mental health evaluation to determine appropriateness of therapies in conjunction with medications, if applicable.

Apple Health Core Connections (AHCC) behavioral health consult recommended. Please call your AHCC Care Coordinator at 1-844-354-9876.
