What is the Background Check System (BCS)?

- Web-based computer application
- BCS allows authorized users to:
 - Submit background checks and receive results online
 - Track the status of submitted background check requests
 - Search, save, and print background check results
 - Receive interim fingerprint results and fingerprint appointment forms
 - Manage system user access and permissions

Why BCS?

- The volume of background checks requested annually through BCCU is 300,000+
- The old Criminal History System (CHS), relied on manual processes for completing a background check request
 - Data entry of applicant information
 - Research in external databases
 - Manual input of analysis
 - Printing, mailing, or faxing physical results back to requesting entities
- CHS was built on a outdated technology that was no longer supportable.

Commonly Used Terms

- **Entity** – *The office or program submitting a background check on behalf of the applicant. For example: Nursing Home, Adult Family Home, or DSHS facility.*
- **Applicant** – *A potential or existing employee completing a Background Check Authorization form (BAF). For example: Employee, student, intern, licensee, or individual provider.*
