What is the diagnosis / medical condition for which the use of bed rails or side rails is being considered? (Do not use ICD10 codes for the diagnosis.)

How many hours a day is there a caregiver available? How many caregivers?

Section 2. Assessment

What is the specific medical or functional need for the bed rails or side rails requested including all related accessories and modifications?

What other alternatives to bed rails or side rails have been tried? What were the results of the trials?

If no alternatives have been tried, please explain.

Does the client already own similar equipment? If yes, why does it not meet their current medical or functional needs?

Bed Rails / Side Rails Form Instructions and Work Flow

1. The Department of Social and Health Services / Area Agency on Aging (AAA) case worker initiates the request for a therapy assessment for bed / side rails by completing form DSHS 13-906 with client demographics, date of request, case worker name and contact information, caregiving hours and number of caregivers, and authorizing prescriber (if known).

2. The rails assessment form is sent to the therapist for completion.

3. The therapist completes the form and makes a determination whether rails are recommended and if so what style of rails and their use.

4. Upon completion of the form the therapist sends the form to the referring case worker and prescriber (whether rails are recommended or not recommended).
   
a) If rails are recommended, and being purchased by the Health Care Authority, the therapist sends the form to the authorizing prescriber and DSHS / AAA case worker.

b) If rails are recommended and being purchased through a LTC waiver or with DDA prior approval, the therapist sends the form to the authorizing prescriber and DSHS / AAA case worker.
