Who do we serve?

Approximately 254,619 deaf and hard of hearing individuals live in the state of Washington. Four out of every 100 residents are deaf or hard of hearing. Washington State has one of the nation’s largest deaf-blind population.

What do we offer?

Telecommunication Relay Service (TRS)
Relay operator services allows people with hearing loss to communicate effectively with others who do not have specialized telephone equipment, in a way similar to what a person with normal hearing and clear speech communicates with the telephone.

Telecommunication Equipment Distribution (TED)
Specialized telephone equipment is available to eligible clients. Trainers provide client training on how to use the equipment.

Deaf Blind Services (DBS)
Support Service Provider provides visual and environmental information. Communication Facilitator provides visual information access through close vision or tactile sign language during Video Relay Service and/or face to face calls via videophones and video relay services.
Sign Language Interpreter Management (SLIM)
A statewide contract for interpreter services is available so that individuals using sign language can communicate with government employees.

Assistive Communication Technology (ACT)
A loan & referral service provides assistive listening systems, real-time captioning and resources to other assistive technology.

Information & Referral (IR)
Respond to requests for information and referral about available resources.

Outreach & Training (OT)
Outreach activities increase awareness about diversity and culture. Training activities provide knowledge and skills to effectively serve people with hearing loss through the provision of reasonable accommodations.

Social & Human Services (SHS)
