Stay away from flooded areas...

Even if it seems safe, the water may still be rising. Never try to walk, swim or drive into the water. It may be moving very fast. Draw a picture of something you saw flooded in your community.

Less than six inches of fast-moving flood water can knock people off their feet, and two feet of water will float a car. If you are in a car stuck in flood waters, get out immediately and move to higher ground.
