Community PARTNERSHIPS

Communities helping **low income**
people access money, medical, food
and child care through online services

DSHS COMMUNITY SERVICES
CUSTOMER CONNECTION

How can YOU HELP?

The DSHS Community Services Division is looking for community partnerships to provide access or support to low income persons who want to apply for public assistance.

Depending on the partnership level you choose, you would provide computer access to applicants and some level of support to help them submit their application.

We have identified four levels of partnership that describe the investment you would make to help applicants.

LEVELS OF PARTNERSHIPS

Associate Level

The associate level partner will have a semi-private computer available for people to apply for benefits. An icon on the desktop will make the application easy to find.

Sponsor Level

As with the associate level partner, a computer with an online application icon for people to apply for benefits will be available. In addition, a telephone, printer and scanner or fax machine would be available for applicants to complete the process.

Contributor Level

The contributor level partner has the same equipment available as the sponsor level partner. In addition, a trained employee or volunteer will be available to assist and advise the applicant with questions.

Benefactor Level

As with the contributor level, a trained volunteer or employee will assist and advise the applicant. Additionally, the benefactor will help those with reading, comprehension or language barriers and will ensure the application and possibly verification, is submitted.
