Psychosis is common and treatable. Don’t wait, learn more, get help early. Learn more at www.dshs.wa.gov/GetHelpEarly
Anyone can develop psychosis. It affects 3 in 100 people, and usually occurs for the first time between the ages of 15 and 30. Have you seen two or more of these warning signs?

- A drop in grades or difficulty doing things that used to be easy
- Strange behavior or beliefs that are out of character and new
- Seeing or hearing things that others do not
- Not sleeping for days
