Source: DSHS, Research and Data Analysis, Client Services Database: analytical extract of 1/30/2009.

Client Services Database Report State Fiscal Year 2001

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

Services provided by each DSHS program are combined into Report Groups. A glossary describing the types of services included in each report group can be accessed by clicking on any of the program or report group titles in the reports, or online at: <http://www1.dshs.wa.gov/rda/research/clientdata/2001/>.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available. CSDB FY2001 annual reports are available at the state, county, and legislative district levels of geography.

Number Served includes all unduplicated clients for report group totals and for program totals. Client counts by report group will not sum to program totals because many clients receive services included in more than one report group. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Client Services Database Report State Fiscal Year 2002

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

Services provided by each DSHS program are combined into Report Groups. A glossary describing the types of services included in each report group can be accessed by clicking on any of the program or report group titles in the reports, or online at:
<http://www1.dshs.wa.gov/rda/research/clientdata/2002/>.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available. CSDB FY2002 annual reports are available at the state, county, and legislative district levels of geography.

Number Served includes all unduplicated clients for report group totals and for program totals. Client counts by report group will not sum to program totals because many clients receive services included in more than one report group. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Source: DSHS, Research and Data Analysis, Client Services Database: analytical extract of 2/2/2009.

Client Services Database Report State Fiscal Year 2003

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

Services provided by each DSHS program are combined into Report Groups. A glossary describing the types of services included in each report group can be accessed by clicking on any of the program or report group titles in the reports, or online at:
<http://www1.dshs.wa.gov/rda/research/clientdata/2003/glossary/all.shtm>.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available. CSDB FY2003 annual reports are available at the state, county, and legislative district levels of geography.

Number Served includes all unduplicated clients for report group totals and for program totals. Client counts by report group will not sum to program totals because many clients receive services included in more than one report group. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Client Services Database Report State Fiscal Year 2004

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available.

Number Served includes all unduplicated clients for report group totals and for program totals. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Child Support Enforcement clients were included for the first time in the CSDB annual data in SFY2004. To maintain comparability across years, clients receiving only Child Support Enforcement services have been excluded from the 2004-2007 data for White Center and comparison communities.

Client Services Database Report State Fiscal Year 2005

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available.

Number Served includes all unduplicated clients for report group totals and for program totals. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Child Support Enforcement clients were included for the first time in the CSDB annual data in SFY2004. To maintain comparability across years, clients receiving only Child Support Enforcement services have been excluded from the 2004-2007 data for White Center and comparison communities.

Client Services Database Report State Fiscal Year 2006

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available.

Number Served includes all unduplicated clients for report group totals and for program totals. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Child Support Enforcement clients were included for the first time in the CSDB annual data in SFY2004. To maintain comparability across years, clients receiving only Child Support Enforcement services have been excluded from the 2004-2007 data for White Center and comparison communities.

Client Services Database Report State Fiscal Year 2007

The data contained in these reports are derived from the Client Services Database (CSDB) which is maintained by Research and Data Analysis (RDA). CSDB combines monthly extracts from the DSHS case management, payment, and fiscal data systems, allowing CSDB to link service records across the department and provide annual summaries of DSHS services based on these client data.

CSDB Annual Reports include data about four age groups: **Youth** (0-17 yrs.), **Adults** (18-64 yrs.), **Seniors** (65 yrs. and over), and **All Ages**. All Ages may represent more than the sum of the age groupings because it includes clients for whom age information was not available.

Number Served includes all unduplicated clients for report group totals and for program totals. The **Use Rate** is the percentage of the population receiving DSHS services by age group and geographic area.

Child Support Enforcement clients were included for the first time in the CSDB annual data in SFY2004. To maintain comparability across years, clients receiving only Child Support Enforcement services have been excluded from the 2004-2007 data for White Center and comparison communities.
