

These measures were produced by the DSHS Research and Data Analysis Division in collaboration with the Washington State Department of Commerce

Homelessness Among Youth Exiting Systems of Care in Washington State

JUNE 2023

About this Report

This report provides information on the housing status of a cohort of youth (ages 12 to 17) and young adults (ages 18 to 24) exiting Washington State inpatient behavioral health, foster care, and criminal legal systems from July 1, 2020, to June 30, 2021. Youth and young adults aging out of foster care, discharged from publicly funded inpatient mental health or substance use disorder treatment, or released from Juvenile Rehabilitation institutions or Department of Corrections facilities are followed over a 12-month period post-release using state administrative data. Administrative information on housing status is used to estimate homelessness rates within 12 months of discharge/release. A profile of youth exiters—as well as county-level breakdowns—are also provided and disaggregated by homelessness status post-exit.

Note that the data and methods used to estimate homelessness are subject to change. The results presented here are based on the most up-to-date methods and data and should not be compared to previous editions of this report.

Youth Populations

Three populations are examined: 1) youth and young adults exiting publicly funded inpatient treatment for mental health or substance use; 2) young adults (ages 18 to 21) who "age out" of foster care; and 3) youth and young adults released from state Juvenile Rehabilitation institutions and young adults released from state Department of Corrections facilities.

Homelessness

Youth and young adults are determined to be homeless if they 1) are identified as homeless based on living arrangement or address information in the Automated Client Eligibility System (ACES); 2) received a housing service targeting homeless individuals that was recorded in the Homelessness Management Information System (HMIS); or 3) were identified as homeless based on ProviderOne Medical claims data.

TECHNICAL NOTES

Data Sources: Identification of the study population, system involvement, information on inpatient services, homelessness, and incarceration records are based on information from the Integrated Client Databases (ICDB). The ICDB was developed and is maintained by RDA. The ICDB combines measures derived from the following administrative systems, among others: ProviderOne (medical claims, diagnoses, and behavioral health inpatient admissions), FamLink (foster care), Automated Client Tracking (juvenile rehabilitation institutions and community facilities), the Behavioral Health Data System (behavioral health inpatient admissions), the Automated Client Eligibility System (economic services and homelessness), and the Homeless Management Information System (housing services and homelessness).

Population: Youth and young adults who exited from any of the following state systems in state fiscal year (SFY) 2021.

1. **Foster Care:** Young adults who exited a foster care placement, were 18 to 21 years of age at the time of exit, and did not return to foster care.
2. **State-Operated Correctional Facility:** Youth ages 12 and older who exited a Juvenile Rehabilitation institution or community placement facility or young adults ages 18 to 24 exiting a Department of Corrections facility.
3. **Inpatient Behavioral Health:** Youth or young adults ages 12 to 24 who received state or federally funded treatment in an inpatient psychiatric facility (i.e., community mental health hospitals, evaluation and treatment facilities, the Children's Long-Term Inpatient Program, the Child Study and Treatment Center, or the state hospitals), inpatient substance use disorder treatment setting, or medical detoxification facility and exited this setting during SFY 2021.

Multiple System Involvement: In situations where a youth or young adult exited multiple state systems of care, they were attributed to the last system of care that they were affiliated with during that year.

NOTE: A value of "< 11" indicates that the contents of a cell have been suppressed in accordance with the Health Care Authority's suppression rules because the total youth or young adult count in that cell was less than or equal to 10.

NOTE: Currently, state data systems do not systematically collect information on all gender identities. Only male and female gender categories are provided in this report.

MEASUREMENT PERIODS

The month in which a youth or young adult is released or discharged from a facility or ages out of foster care is the reference month (Month 0). Housing status is reported for Month +1 through Month +3 (i.e., Homeless within 3 months) and for Month +1 through Month +12 (i.e., Homeless within 12 months). Demographic information is reported as of the reference month. Case history lookback windows begin in the month prior to the reference month (Month -1) and go back through Month - 24 (e.g., mental health treatment need), or over a youth's entire history (e.g., maltreatment history).

MEASURES

Homeless Status: This is determined based on the following: 1) client living arrangement (*Homeless without Housing, Emergency Shelter, Battered Spouse Shelter, Inappropriate Living Situation*) from the Automated Client Eligibility System (ACES); 2) address information in ACES indicating that a youth or young adult was listed as homeless (e.g., a youth's or young adult's address was "homeless"); 3) housing service information recorded in the Homeless Management Information System (HMIS); or 4) information from ProvideOne medical claims data. Youth and young adults were identified as homeless if they experienced a homeless spell in the 12 months following exit from a state system of care.

Foster Care and Child Welfare Involvement: Foster care placement includes out-of-home placements with kinship, congregate, and foster caregivers and temporary placement events, such as on-the-run and hospital events, but does not include placement in juvenile detention or rehabilitation centers or trial return home periods. Child welfare involvement includes the receipt of any Department of Children, Youth, and Families (DCYF) child welfare system services or case management.

Readmitted: Youth and young adults are considered readmitted if they return to any institutional setting (residential/inpatient treatment for mental health or substance use; Juvenile Rehabilitation institution/community facility or adult correctional facility; or foster care) at any time during the 12-month follow-up period. Youth and young adults may count as readmitted and homeless if both conditions apply during the follow-up period.

County: Assigned as of the last month that a youth or young adult exited any state system of care.
